Bound by Creativity Hannah Wohl, 2021-06-23 In Creative Visions sociologist Hannah Wohl draws on more than one hundred interviews and two years of ethnographic research in the New York contemporary art market developing a sociological perspective on creativity through the analytic lens of judgment The artists she encountered range from those trying to land their first solo exhibition to those with several dozens of museum exhibitions She visited their studios and saw firsthand how they decided which works to leave unfinished or to destroy put into storage or exhibit She observed the installation of exhibitions in galleries assisted in selling artwork for a gallery and followed private collectors around art fairs and VIP collector events Moments of judgment whether by artists curators dealers or buyers led her to uncover that artistic practices are deeply sociological both because artists decisions are informed by their interactions with others and because artists decisions about their work affect the objects which circulate through the social world Artists recognize that exhibitors and collectors prefer artists whom they deem to display a clear signature style Wohl also explores judgment in art as part of the creative process Evaluation she says is both a way that one judges how good a work is and how one makes decisions about producing work Our understanding of creative work rests on these highly social dynamics Wohl shows shedding new light on the production of cultural objects and prestige

The Contemporary Art Gallery David Carrier, Darren Jones, 2016-09-23 Everyone who looks at contemporary art is familiar with galleries But visual features of these mysterious temples tend to be taken for granted The basic purpose of this book is to enliven the reader's latent knowledge of galleries including architectural motifs the intended impression that is conveyed to the visitor and human interactions within them The contemporary art world system includes artists studios art galleries homes of collectors and public art museums To comprehend art one needs to understand these settings and how it travels through them The contemporary art gallery is a store where luxury goods are sold What distinguishes it from stores selling other luxuries upscale clothing jewelry and posh cars is the nature of the merchandise While much has been written about the art this book uncovers the secretive culture of the galleries themselves The gallery is the public site where art is first seen anyone can come and look for free This store a commercial site is where aesthetic judgments are made Art's value is determined in this marketplace by the consensus formed by public opinion professional reviewers and sales The gallery then is the nexus of the enigmatic billion dollar art world and it is that space that is dissected here The first chapter briefly describes the beginnings of the present contemporary art gallery The second presents the experience of gallery going presenting summary accounts of visits to some contemporary galleries The third expands and extends that analysis with detailed close up descriptions and comparative evaluations of many diverse contemporary galleries in order to identify the challenges provided by these marvelous places Then the fourth chapter indicates why in the near future due to the proliferation of myriad art fairs and online platforms extant today such galleries might disappear altogether

Museums and Wealth Nizan Shaked, 2022-01-13 Choice Outstanding Academic Title 2023 A critical analysis of contemporary art collections and the value form this book shows why the nonprofit system is unfit to administer our common collections and offers solutions for diversity reform and redistributive restructuring In the United States institutions administered by the nonprofit system have an ambiguous status as they are neither entirely private nor fully public Among nonprofits the museum is unique as it is the only institution where trustees tend to collect the same objects they hold in public trust on behalf of the nation if not humanity The public serves as alibi for establishing the symbolic value of art which sustains its monetary value and its markets This structure allows for wealthy individuals at the helm to gain financial benefits from and ideological control over what is at its core purpose a public system The dramatic growth of the art market and the development of financial tools based on art collateral loans exacerbate the contradiction between the needs of museum leadership versus that of the public Indeed a history of private support in the US is a history of racist discrimination and the common collections reflect this fact A history of how private collections were turned public gives context Since the late Renaissance private collections legitimized the prince's right to rule and later with the great revolutions display consolidated national identity But the rise of the American museum reversed this and re privatized the public collection A materialist description of the museum as a model institution of the liberal nation state reveals constellations of imperialist social relations
