**Computer Vision for Beginners** Booker Blunt, 2025-07-08. Teach your computer to see and understand images with code you can write today. Computer Vision for Beginners is a hands-on guide to building image recognition and analysis projects using Python and OpenCV, the most widely used computer vision library. Designed for absolute beginners, this book walks you step by step through the basics of working with images, detecting objects, and building simple AI-powered tools. No advanced math or machine learning background needed, just basic Python and curiosity. In this book, you'll learn how to read, display, and manipulate images using OpenCV. Detect shapes, edges, faces, and colors in photos and video. Build a basic object detection system. Use contouring and masking for advanced image filtering. Create a motion detection system with your webcam. Apply image transformations, filters, and enhancements. Recognize handwritten digits using machine learning. Train custom classifiers with your own images. Understand how computer vision powers real-world applications. Each chapter includes working code, examples, visuals, and tips for experimenting with your own projects. If you're interested in AI image processing or automation, Computer Vision for Beginners is your practical introduction to building tools that can see and interpret the world using nothing but Python.
