Coding Without Code A. I. Circuit, 2025-07-28 *Coding Without Code* Discover the Magic of Vibe Coding is a groundbreaking children's book that introduces a revolutionary idea: you don't need to write code to create with AI; you just need your imagination. Designed for curious minds around age 10, this book empowers kids to become creative directors, not coders, by using natural language, feelings, drawings, and feedback to shape the behavior of intelligent machines. Told through the adventures of Emma and Noah, two young inventors, readers explore a new kind of creative expression where ideas and emotions become building blocks. Each colorful spread pairs a fun story with an engaging concept explanation, like teaching AI with moods instead of commands, debugging by clapping or changing music, or building an app by whispering a dream. Rather than teaching programming syntax, this book opens the door to Vibe Coding, a powerful and accessible way to interact with multi-agent AI systems. It introduces key ideas like Prompts and prototypes, Emotional tuning and creative control, Teamwork with AI agents, Iterative design thinking, and Natural language as interface. Whether designing a jellybean chase game or a floating garden that grows with your feelings, *Coding Without Code* encourages children to dream, direct, and design using tools of the future, no typing required. Perfect for classrooms, STEM programs, or home libraries, this book redefines what it means to code. It makes space for visual thinkers, storytellers, artists, and inventors who may not see themselves as traditional programmers but are ready to shape the next generation of AI. This title is part of the AI Circuit Series and can be paired with optional teacher guides, vocabulary extensions, and AI-generated illustrations to deepen learning. Let's build with wonder. Let's code with feeling. Let's discover the magic of Vibe Coding.

The Future of Coding with Claude Beckford M Wescott, 2025-09-30 Are you still writing code line by line when AI can do the heavy lifting? What if you could turn your ideas into deployable software just by describing what you want? And more importantly, are you using Claude Code to its full potential, or are you only scratching the surface without realizing what's possible? Developers everywhere are discovering that AI isn't just a helper; it's becoming a core part of the development workflow. But here's the real question: are you leading that shift, or watching it happen from the sidelines? This book invites you into a conversation, not a lecture. You'll constantly be prompted to think: When was the last time you built an MVP in hours instead of weeks? Do you rely on AI only for snippets when it could generate entire architectures? Are you confident Claude is giving you secure, production-ready code, or do you just hope it is? What would your development look like if AI handled your documentation, tests, and refactoring as you built? You already know AI can accelerate development, but do you know how to direct it with precision? This book doesn't assume you're a beginner or a skeptic. It assumes you're a builder, someone who wants practical strategies to integrate AI into real workflows: frontend, backend, DevOps, automation, testing, debugging, deployment, and scaling. Expect to be challenged. Are your prompts clear enough to get quality results on the first try? Do you know how to iterate with AI without losing control of the codebase? What about compliance, testing, or integrating with existing stacks? Are you guessing or guiding? Along the way, you'll explore real-world applications, automation strategies, collaborative workflows, and the mindshift required to work alongside

Build AI Agents That Work Marek Ellison, 2025-07-29 Build AI Agents That Work A Practical Guide to Designing Coding and Deploying Intelligent Systems Without a PhD You're not just curious about AI you're ready to build with it But every time you try to make progress you hit a wall tutorials that are outdated documentation that's vague and books written like academic papers for PhDs It's frustrating It's overwhelming And it's holding you back from building the powerful intelligent systems you know you're capable of This book changes that forever Build AI Agents That Work is the hands on guide for builders who want results not theory Whether you're a developer entrepreneur or tech savvy creator this book

gives you everything you need to go from zero to real world AI agents even if you've never touched machine learning before. You'll learn how to Design autonomous agents that think, reason, plan, and act. Connect language models to tools, memory, APIs, and real environments. Use modern frameworks like LangChain, LangGraph, OpenAI, and vector databases. Build multi-agent systems and add human-in-the-loop controls for safety. Deploy your agents into production, fast, stable, and scalable. With clean explanations and practical code in Python and JavaScript, this book doesn't just teach you how to build AI; it teaches you how to ship it. You'll skip the fluff and dive straight into solutions that work in the real world for real users solving real problems. Whether you're automating workflows, creating smart assistants, building SaaS tools, or launching the next AI-powered startup, this book gives you the blueprint to make it happen. No academic gatekeeping. No overcomplication. No more waiting. Your future as an AI builder starts here, and the only thing standing between your ideas and the impact you want to make is what you're about to read. This isn't just a book; it's the key to unlocking the AI revolution with your hands on the code.
