have to rely on the wills of others and your courage to set up your business. However, it is not impossible and there are different ways to be self-employed which can provide you with more freedom and flexibility while still bringing in some money. If you want to work at home, then this is the technology which is enabling the change and it is allowing nomads to work from home. Companies are recognising the potential of this new method of working and the first areas to embrace the new way of working are the legal ones. However, it is not just the legal firms and public sector which are looking to employment technology in order to cut costs. Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits. For example, restaurants are using recruitment technology in order to lower salaries and costs. Until a few years ago, when every restaurant had a fixed cost of hiring, training and maintenance, the vast majority of restaurants were able to pay 100% of their employees' salaries. This meant that it was possible to pay a manager less than a waiter and save money. However, with the inclusion of recruitment technology, the cost of hiring employees is being cut by up to 50%. This does not necessarily mean that the amount of profit is increased, but employees are able to be assigned to different tasks, meaning that they spend less time in front of customers, thus increasing their profits. **Information**, 2000    *Digital Nomad* Daniel Shore, The digital nomad lifestyle has gained popularity in recent years due to advancements in technology and a shift in work culture towards remote employment. Digital nomads typically rely on laptops, smartphones and internet connectivity to perform their work from anywhere with a reliable internet connection. This lifestyle enables individuals to break free from the traditional office setting, allowing them to choose their own hours, travel to new destinations and immerse themselves in different cultures. One of the key aspects of the digital nomad lifestyle is flexibility. Since most digital nomads work as freelancers, consultants or remote employees, they have the freedom to design their own work schedule. This flexibility allows them to prioritize experiences over material possessions, spending their time and resources on travel, exploration and personal growth. However, the digital nomad lifestyle also comes with its challenges. Adapting to different time zones, managing work-life balance and maintaining a stable income stream while on the road can be daunting tasks. Digital nomads must also navigate visa requirements, cultural differences and logistical issues related to accommodation, transportation and healthcare. Despite these challenges, many individuals find the digital nomad lifestyle to be incredibly rewarding. It offers the opportunity to live and work on their own terms, fostering creativity, independence and a sense of adventure. Whether it's working from a beachside cafe in Bali, a co-working space in Lisbon or a mountain retreat in Colorado, the digital nomad lifestyle opens up a world of possibilities for those willing to embrace it.
