Communal Liberalism:

Communal Liberalism Paul Biya, 1987 *Mme de Staël and Political Liberalism in France* Chinatsu Takeda, 2018-07-31

This book sheds light on the unique aspects of communal liberalism in Mme de Staël's writings and considers her contribution to nineteenth century French liberal political thought. Focusing notably on the *Considérations sur les principaux événements de la Révolution française* it examines the originality of Staël's liberal philosophy. Rather than contrasting liberalism with either multiculturalism or republicanism the book argues that Staël's communal liberalism challenges the conventions of nineteenth century political thought notably through her assertion of the need to institutionalize an organic intermediary connecting the two spheres an idea later advanced by thinkers such as Jürgen Habermas. Offering a critical reappraisal of Staël's multifaceted work this book assesses the political impact of her work arguing that the political influence of the *Considérations* permeates the liberal historiography of the French Revolution up to the present day. *Communal Liberalism*, 1986 [Religion and the Common Good](#) Brian Stiltner, 1999-07-28 The term 'common good' has often been ill defined or undefined in political philosophical and theological discourses. Brian Stiltner seeks to repair this deficit in his study *Religion and the Common Good*. He explores the meaning of the common good and the prospects for pursuing it in a liberal society. Focusing on the conceptions of common good in liberalism and communitarianism the former stressing individual rights and social tolerance the latter stressing a community's shared history and social practices Stiltner argues that the two theories are not as irreconcilable as they seem that they can be combined into a 'communal liberalism'. Stiltner provides an outline of the twentieth century Catholic common good theory as an example of such a synthesis. A fascinating study *Religion and the Common Good* will be an invaluable volume for scholars of social ethics religion theology philosophy and political science.

Political Philosophies and Nation-Building in Cameroon Andrew Aseh, 2016-10-15 This is a comprehensive text on the function of thought in the history and political sociology of Cameroon. The book brings out how the hidden hand of history fashions a political thought which in turn creates its own history. Instead of Cameroonians making history history makes Cameroonians. The book shows how political ideas are fashioned in a post colonial context in which Europeans impose a superordinate arrangement on a people together with its philosophers. Thinking the nation in Cameroon on behalf of Europeans especially after the leaders of the national liberation struggle were all eliminated. European philosophers put in place a repressive machine under which Cameroonians were subjected between 1958 and 1990. Repression gave way to a refined form of enslavement a modernised version of slavery. Cameroonians joined the bandwagon and have been producing and reproducing Western industrial economies while day dreaming of what they will never become. The whole idea of nation building in post colonial Africa is put in question. This book offers students of political studies sociology anthropology and history compelling evidence to grapple with questions as to whether Cameroon is a state or a nation and questions of sovereignty and citizenship. Religious Diversity and Public Religion in China Zhibin Xie,2017-03-02

This book addresses the issue of public religion and its implications in Chinese society Zhibin Xie explores various normative considerations concerning the appropriate role of religion in public political life in a democratic culture Besides drawing on the theoretical discourse on religion in the public sphere from Western academics it holds that the issue of religion in Chinese politics should be addressed by paying attention to characteristics of religious diversity and its political context in China This leads to a position of liberal constrained public religion in China which encourages religious contribution to the public sphere as a substantial component of religious liberty in China on the one hand and proposes some constraints both upon government and religions for regulating religious political discourse on the other
