Communicating with the Elderly Barbara J. Cox, Lois Waller, 1987-01-01 Communication, Health, and the Elderly
Howard Giles, Nikolas Coupland, John M. Wiemann, 1990 How to Say It® to Seniors David Solie, 2004-09-07 A practical guide to bridging the generation gap In *How to Say It to Seniors* geriatric psychology expert David Solie offers help in removing the typical communication blocks many experience with the elderly By sharing his insights into the later stages of life Solie helps in understanding the unique perspective of seniors and provides the tools to relate to them

Person-Centered Communication with Older Adults Timothy A. Storlie, 2015-06-01 Providers serving older adults face a growing problem Older adults are becoming increasingly dissatisfied with service quality citing deficits in provider communication and relationship skills The author argues this dissatisfaction is largely related to three widespread issues ageism use of professional jargon and age related changes in the older adult To address these concerns Dr Storlie advocates adoption of an evidence based person centered approach to communication The benefits of person centered communication are many They can increase older adult satisfaction with provider services enhance mutual respect and understanding improve accuracy of information exchanged positively impact service outcomes increase compliance with provider recommendations and reduce the frustration and stress often experienced by both provider and older adult Rare to this genre readers are introduced to several under explored topics within the field of communication along with methods for applying concepts from research findings into these topics to enhance the quality of interpersonal communication Topics include the role of mental imagery in the communication process the influence of neurocardiology on relationships and controversial findings from research into quantum physics The book concludes by highlighting progress made in narrowing the interpersonal communication gap and forecasts how communications oriented technological advances might improve quality of life for 21st century older adults and the providers who serve them Utilizing interdisciplinary case studies to illustrate common problematic situations this book provides detailed exercises that explain how providers can integrate person centered communication into their practices to improve provider older adult interactions Written in a style designed to maximize learning it helps providers find the information they need understand what they read and apply what they've learned to improve professional communication *Person Centered Communication with Older Adults* is an essential guide for today's healthcare professionals and other aging services providers and also for the educators who help to prepare the providers of tomorrow Presents a conceptual framework for understanding respect based person centered communication Teaches specific communication skills to aging services providers and educators to assist in effectively communicating with older adults Includes numerous case studies to help in identifying common problematic situations and describing practical ways to integrate positive communication One of the first books to integrate scientific evidence based findings with a personal approach that includes important new information on neurocardiology **Communicating with the Elderly** Vicki

S. Freimuth,1979 *Communication in Elderly Care* Peter Backhaus,2011-06-09 The topic of communication in elderly care is becoming ever more pressing with an aging world population and burgeoning numbers of people needing care This book looks at this critical but underanalyzed area It examines the way people talk to each other in eldercare settings from an interdisciplinary and globally cross cultural perspective The small body of available research points to eldercare communication taking place with its own specific conditions and contexts Often there is the presence of various mental physical ailments on the part of the care receivers scarcity of time resources and or flexibility on the part of the care givers and a mutual necessity of providing receiving assistance with intimate personal activities The book combines theory and practice with linguistically informed analysis of real life interaction in eldercare settings across the world Each chapter closes with a Practical Recommendations section that contains suggestions on how communication in eldercare can be improved This book is an important and timely publication that will appeal to researchers and carers alike

Communication Skills for Working with Elders Barbara Dreher, PhD,2001-03-21 Dr Dreher s book is a concise and highly readable guide to developing and enhancing one s communication skills for the betterment of the elderly person s quality of life It clearly has a place on the bookshelf of every layman and professional alike who interacts with elderly people Gerontology and Geriatrics Education about the first edition extremely useful as a teaching tool Geriatric Nursing about the first edition This popular text provides practical guidelines for effective interaction with the elderly and presents techniques for overcoming common communication problems and disorders common among elders New to this second edition are chapters addressing assisted living the use of computers for communication the Boomers and new approaches for dealing with emotional strains of anxiety and depression among others Each chapter concludes with exercises and activities designed to help readers practice and hone their skills This book is ideal for courses in departments of gerontology social work nursing and communication

Interpersonal Communication in Older Adulthood Mary Lee Hummert,John M. Wiemann,John F. Nussbaum,1994-09-13 This book is particularly relevant now as the baby boomer generation is aging and a greater proportion of the world s population is growing older Interpersonal communication is clearly the most critical process for promoting social integration and adaptation of older adults within society Yet understanding of the complex dynamics of interpersonal communication with the elderly is severely limited and the aged are often stigmatized stereotyped and isolated This book will help clarify the role of communication in effective social integration and adaptation of the aged by providing comprehensive and in depth analyses of relevant research and theory The book integrates information on the most important issues and contexts influencing interpersonal communication and aging and the individual chapters are written by an excellent group of authors who have demonstrated expertise on their topics The book is well organized clearly written and comprehensive The major topics are logically organized and compelling I highly recommend this book Gary L Kreps Northern Illinois University Aging obviously occurs at many levels with biological psychological and social systems showing

multidirectional and interdependent changes. What is less obvious is how these factors affect communication in later life. This volume represents a strong contribution toward solving this problem by bringing together a group of prominent scholars with diverse perspectives on language communication and aging. Elizabeth A. I. Stine, University of New Hampshire. The Hummert, Wiemann, and Nussbaum book brings together a strong theoretical base with the presentation of new data. The chapters go well beyond the typical literature reviews usually found in edited volumes. The contributors provide sophisticated presentations of a variety of socially significant and unique topics including the communicative impact of physical and cognitive changes sometimes associated with aging, patronization, verbosity, frailty, conversational skills, proper names, and the presentation of self. Some of the chapters are strongly quantitative while others are more interpretive. After building a strong rationale for the volume, the editors go on to put together a series of well-written chapters that provide a much needed emphasis on the social construction of relationships through communication. The book should prompt much new research and advance our understanding of interpersonal communication and the aging process significantly. Teresa Thompson, University of Dayton. The rich diversity of theoretical and methodological perspectives highlighted within the various chapters is an impressive feature of this edited collection. These essays add conceptual breadth and depth to our understanding of interpersonal communication and the process of aging. Mary Anne Fitzpatrick, Department of Communication Arts, University of Wisconsin. This book is a valuable addition to the gerontological literature. Written from the perspective of the communication researcher, it brings together existing literature and offers new insights to gerontologists working in many social science disciplines. I recommend *Interpersonal Communication in Older Adulthood* as a resource to any scholars interested in older adults. Victor G. Cicirelli, Professor of Developmental and Aging Psychology, Purdue University. This book is very timely. Communication is offering a new wave of aging research and interpersonal processes in communication are where our experiences and our personal theories of aging are grounded. This book brings together many of the researchers who are breaking new ground in communication and aging. It offers a valuable overview of where we have gone in aging theory, communicatively, and where we need to go. *Interpersonal Communication in Older Adulthood* demonstrates the rich diversity of methods and traditions of communication research that are beginning to illuminate gerontology. Nikolas Coupland, University of Wales, Cardiff. By highlighting the commonalities across a range of disciplines, *Interpersonal Communication in Older Adulthood* provides a unique and broad-based perspective on communication and aging. This integrative approach brings together the best of the current research and theory from communication, cognitive psychology, psycholinguistics, and medical sociology. The underlying framework of the book centers around three topics: cognition, language, and relationships, exploring the individual areas as well as the ways they intersect. In addition, this volume brings to light the implications of the elderly population's individual differences as they affect communication and illustrates the positive as well as the negative effects of the aging process on language production, relational satisfaction, and other

communication related variables This major reference source *Interpersonal Communication in Older Adulthood* is essential reading for anyone concerned with the issues of aging and communication **Communication and Aging** Jon F.

Nussbaum,Loretta L. Pecchioni,James D. Robinson,Teresa L. Thompson,2013-05-13 This text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging It continues the groundbreaking work of the first edition emphasizing a life span approach toward understanding the social interaction that occurs during later life The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging positive and negative stereotypes toward older adults and health communication issues It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people s lives The impact of nonrelational processes such as hearing loss are considered as they impact relationships with others and affect the ability to age successfully The book is organized into 14 chapters Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences As in the first edition when the literature is empirically based the communicative ramifications are then discussed Readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span Developed for students in communication psychology nursing social gerontology sociology and related areas *Communication and Aging* provides important insights on communication to all who are affected by the aging process **Language and Communication in the Elderly** Loraine K.

Obler,Martin L. Albert,1980 **Handbook of Communication and Aging Research** Jon F. Nussbaum,Justine Coupland,2004-04-12 This second edition of the *Handbook of Communication and Aging Research* captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only

current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging

Communication Disorders in Aging Raymond H. Hull, Kathleen M. Griffin, 1989 This book concentrates not only on the various communication disorders primarily affecting older adults but also upon aspects of ageing that have an impact on caring services and strategies The topics covered are those described by professionals who provide services to the communicatively impaired elderly as those most critical for both practising professionals and students who are preparing to serve the growing population of ageing persons

Communication for Successful Aging Howard Giles, Jessica Gasiorek, Shardé M. Davis, Jane Giles, 2021-11-22 This essential volume explores the vital role of communication in the aging process and how this varies for different social groups and cultural communities It reveals how communication can empower people in the process of aging and that how we communicate about age is critically important to and is at the heart of aging successfully Giles et al confront the uncertainty and negativity surrounding aging a process with which we all have to cope by expertly placing communication at the core of the process They address the need to avoid negative language discuss the lifespan as an evolving adventure and introduce a new theory of successful aging the communication ecology model of successful aging CEMSA They explore the research on key topics including age stereotypes age identities and messages of ageism the role of culture gender ethnicity and being a member of marginalized groups the ingredients of intergenerational communication depiction of aging and youth in the media and how and why talk about death and dying can be instrumental in promoting control over life's demands Communication for Successful Aging is essential reading for graduate students of psychology human development gerontology and communication scholars in the social sciences and all of us concerned with this complex academic and highly personal topic

Aging, Communication, and Health Mary Lee Hummert, Jon F. Nussbaum, 2001-03-01 This collection highlights the current efforts by scholars and researchers to understand the aging process as it relates to the health of older adults With contributions from international scholars in communication psychology public health medicine nursing and other areas this volume emphasizes communication as a critical research education policy and practice issue for the design provision and evaluation of health and social services for older adults Organized into sections addressing communication developments in the healthcare arena issues in provider patient communication and the relationships between family communication and health The chapters cover critical topics related to successful aging such as Alzheimer's disease managed care and older adults communication issues of severe dementia and healthcare decision making within families The editors have designed this volume to be accessible to a broad audience including scholars and students of aging and communication healthcare practitioners with older clients and aging individuals and their families who

are pursuing strategies for successful aging The chapters represent the highest levels of current scholarship on communication aging and health providing a strong foundation for future research Each contribution also addresses the applied implications of this research offering practical guidance to readers dealing with these issues in their own lives As a whole Aging Communication and Health represents a major advance toward understanding the importance and application of communication for successful aging **Communication Behavior and Aging** Barbara Bennett Shadden,1988
