Anthropological Theory Robert Alan Manners,David Kaplan, Anthropological theory has been much discussed in recent years yet the crucial questions still remain how can it be defined how is it developed how is it to be applied and how can one confirm it The editors of Anthropological Theory answer these questions by presenting essays relating to various aspects of anthropological theory Their selections from widely scattered and often difficult to obtain sources present a comprehensive set of writings that describe the current position and issues involved in theory The development of field work in anthropology generated a tremendous emphasis on empirical data and research The plethora of information awaiting collection and the enthusiasm

with which the field embraced it so immersed anthropologists that they were unable to relate this new information to the field as a whole Manners and Kaplan believe that this lack of generalization had a profoundly negative effect upon the discipline Therefore they look closely into the relationship between field work and theory in an opening essay and go on to present material that demonstrates the value and the necessity of theory in anthropology Essays by anthropologists and other social scientists deal with explanation evolution ecology ideology structuralism and a number of other issues reflecting throughout the editors conviction that anthropology is a science the goal of which is to produce generalizations about sociocultural phenomena The book provides necessary perspective for examining and evaluating the crucial intellectual concerns of modern anthropology and will therefore be important for the work of every anthropologist Robert A Manners 1913 1996 received his Ph D from Columbia University and carried on field work in the Caribbean among American Indians in the Southwest and in East Africa He wrote numerous articles and reviews for anthropological journals as well as many books He was professor of anthropology Brandeis University where he started up the department David Kaplan is professor emeritus of anthropology at Brandeis University He has contributed articles and reviews to various journals He has also done field work in Mexico and his areas of specialty include economic anthropology method and theory and peasant culture of Mesoamerica

applications that examine typical communications in organizations to discover the state of an organization observed by the communicators They provide more than 80 figures and tables illustrating the applications The discussion progresses through methods of constructing and using information backdrops for analysis of communications to methods of combining the results of analyses Methods of syntactical analysis and of semantical analysis are surveyed This book will be an important tool for management teams concerned with improving the information flows and decision processes of organizations as well as students and professionals concerned with management FF Communications Folklore Fellows,1982 The Range of Social Theory Floyd Nelson House,1929 **Computerworld** ,1990-02-19 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Conceptual Limits of Development Communications Theory** Herman Felstehausen,1973 *Using Mass Communication Theory* Maxwell E.
