exploration of the unique landscape of Chinese language learning and teaching in Canada. It is the first to highlight the distinctive features of Chinese language education in the country and to introduce the Canadian approach to teaching and researching Chinese language, termed the Canadian school of Chinese education. This approach, largely unfamiliar to the global academic community, is illuminated in this book, filling a critical gap in the literature and providing a platform for Canadian voices and perspectives in the field. The book delves into original and under-investigated areas, addressing important issues in Chinese teaching and learning that require more sophisticated research approaches due to advancements in our understanding and the discovery of complex Chinese learner populations. Structured into four sections, the book offers an overview of Chinese language education in Canada, examines comparisons of learning conditions, explores interactive dynamics and communication strategies, and delves into social and cultural dimensions. This book will be invaluable to researchers, instructors, advanced level undergraduate students, and graduate students in the field of Chinese language learning and teaching.

Chinese Communication Theory and Research Wenshan Jia, Xing Lu, D. Ray Heisey, 2002-06-30. A systematic examination of Chinese communication scholarship and comprehensive critique of its theories and methodologies are long overdue, and in this new collection of essays by a multicultural group of scholars, both aims are achieved. Focusing on such relatively new fields as Chinese health communication and Chinese communication on the internet, the volume addresses key questions about the state and the future of its field. Both challenging and complementing the Western views of communication, it advances theories of cultural and intercultural communication while at the same time broadening our understanding of the relevance of Chinese communication studies to communication studies overall and the ways in which this subdiscipline points the way toward a new and more complicated future. The essayists, whose origins include the United States, Taiwan, Hong Kong, and China, bring their many perspectives to bear on what is the most comprehensive and inclusive review of Chinese communication research literature published in English. Of great benefit to Western and Eastern communication theorists, philosophers of social science, and Asian studies scholars, *Chinese Communication Theory and Research* is an invaluable guide to an increasingly complex and significant field of study.
