*God's Mission in Asia* Ken

Christoph Miyamoto,2007-06-15 Ecumenism in postwar Asia institutionalized in the Christian Conference of Asia displayed a remarkable this worldliness from its inception in the 1940s This tendency was in contrast to the tension between the church centric and world centric approaches to Christian mission that marked conciliar mission thinking in the West This work examines the development of such this worldly holiness in Asian ecumenism focusing on M M Thomas of India and C S Song from Taiwan Special attention is drawn to the idea of God s this worldly presence that considers God as redemptively at work in world history apart from the church The study first compares the development of this worldly holiness in the West and Asia and then examines the thinking of Thomas and Song The chapters on these two theologians discuss their backgrounds the basic concerns motivating their intellectual searches and responses to the questions arising from such concerns These chapters also try to understand how these theologians view the relationship between God and the world In so doing the study highlights the significance of the idea of God s this worldly presence shared by Thomas and Song in spite of differences in their backgrounds approaches and theological formulations Having compared Thomas and Song the study concludes that the

idea of God's this worldly presence became central to Asian ecumenism because it offered a common unifying vision to Asian Christians who come from a region characterized by tremendous diversity. The idea helped them to see the diverse peoples, cultures and religions in Asia under one God who transcends the diversity and still takes it seriously. Arundhati Roy's *The God of Small Things* Alex Tickell, 2007-05-07. History Commission, 2005. *The First Communist Ministry in Kerala, India, 1957-1959* Georges Kristoffel Lieten, 1980. *Votes and Violence* Steven Wilkinson, 2006-11-23. Why do ethnic riots break out when and where they do? Why do some governments try to prevent ethnic riots while others do nothing or even participate in the violence? In this book, Steven I. Wilkinson uses collected data on Hindu-Muslim riots, socio-economic factors and competitive politics in India to test his theory that riots are fomented in order to win elections and that governments decide whether to stop them or not based on the likely electoral cost of doing so. He finds that electoral factors account for most of the state-level variation in Hindu-Muslim riots, explaining for example why riots took place in Gujarat in 2002 but not in many other states where militants tried to foment violence. The general electoral theory he develops for India is extended to Ireland, Malaysia and Romania as Wilkinson shows that similar political factors motivate ethnic violence in many different countries.

*The Phoenix Moment* Praful Bidwai, 2015-11-01 Praful Bidwai s analysis and conclusions compel serious engagement both by academics and political leaders K N Panikkar Bidwai s assessments will undoubtedly trigger further discussion Romila Thapar Praful raises the right questions and is scrupulously fair Susan George India still has a significant and relatively powerful communist movement In spite of the massive setbacks communist parties have suffered in and since the 2014 national elections and their general decline during the past decade the Indian Left is a significant component of the political spectrum It is represented in virtually every state in the form of trade unions peasant associations women s organizations and student unions and in state legislatures municipal bodies and village councils The Phoenix Moment seeks to understand how a communist movement almost unique within the world s capitalist democracies flourished for so long in India and what accounts for its initially gradual and then rapid decline It also asks how far and in what manner the Left has accomplished its goals whether it could have achieved more and what its future prospects are Crucially political analyst Praful Bidwai investigates whether the Left s core agenda of progressive or socialist transformation can yet be reinvented and restored to relevance either with its own agency or through other forces formations and initiatives Given the paucity of analytical literature on the mainstream Left at the national level Bidwai s timely and deeply insightful book fills a crucial void
