Community, and Co-Ops in a Global Era Carl Ratner,2012-11-15 Globalization pressures have made cooperation on a global
scale both necessary and possible But cooperation is not easy in a world dominated by individual cultural and national selfish
interests The opposition to cooperation means that cooperation is not natural but must be instituted through an intellectual
and social struggle against countervailing forces This book discusses issues that are necessary to describe the nature of
cooperation and how it can be promoted as a social and ethical ideal amidst a sea of competing interests Dr Ratner uses the
framework of cooperativism that is the system of social institutions social philosophy cultural psychology and politics that
promotes cooperation as a starting point Elements of cooperativism are derived from a rigorous analysis of various sources
including the needs of tendencies of human culture and human psychology *Communist and Co-operative Colonies.*

First rather than reify the geographical tradition Dissident Geographies introduces a number of geographical traditions that
challenge and destabilize what counts as geographical knowledge Second the book shows how the production of
geographical knowledge is tied to politics and struggles outside as well as within the academy In each chapter case studies
