Local Lives and Global Transformations Paul Kennedy, 2017-09-16 Globalization is widely accepted as being a defining process of our modern society But to what extent do individuals think feel or act in a way that takes account of the whole world Do globalization processes really affect us in our everyday lives And if so where are the boundaries between local and global society This book investigates how local and global studies overlap and interact by examining how real local lives function under global conditions It begins by unravelling the most important concepts and debates in the field opening them up to scrutiny and testing their assumptions through recent case studies and empirical material The book goes on to examine the power of local

forces in forming global processes and explores our attachment to local vs global identities whilst asking if we can build on our local attachments to move towards a world society From concerns about the international economy and growing global inequalities to worldwide fears of organized crime and terrorism this insightful book suggests a new way of looking at the interaction of local and global transformations Local Lives and Global Transformations gives student readers the knowledge and the encouragement to push the boundaries of their understanding of globalization It is inspiring reading for all those studying and interested in globalization throughout the social sciences
