## **Community Of Those Who Have Nothing In Common:**

*Encounters with Alphonso Lingis* Alexander E. Hooke, Wolfgang Walter Fuchs, 2003-01-01 Encounters with Alphonso Lingis is the first extensive study of this American philosopher who is gaining an international reputation to augment his national one The distinguished contributors to this volume address most of the central themes found in Lingis's writings including singularity and otherness death and eroticism emotions and rationality embodiment and the face excess and the sacred The book closes with a new essay by Lingis himself

**Community Education for Social Justice** Cameron White, 2014-02-05 What is community How important is community in the 21st century Where might the idea of community fit in education and schooling teaching and learning These are the questions and themes embedded in this book The general critique is that community is an add on in our schools and often is dismissed as a result of the individualistic and competitive nature of schooling today Our focus is to provide critical investigations as to the possibility of community and that we need community now more than ever The concept of community education brings many ideas and issues to mind Related themes include place based field based environmental service learning and outdoor education Each has its own more narrow focus with community education perhaps an umbrella term than encompasses them all Nevertheless the suggestion here is that instead of community education serving as an extension or add on to traditional approaches it should be the focus of all education What is often missing in teaching and learning are contexts and connections that make education meaningful Community education engages participants in problem and issues based approaches to the local community thereby facilitating that local to global link Instead of compartmentalized subjects integrated approaches use what students and the community know or understand to develop further questions solutions or even problems Community education offers efficacy in that it provides opportunities for collaboration in addressing local issues and problems It enables the community to become the classroom thus ensuring a more long term connection to active rather than passive endeavors as citizens

*Music Making and Civic Imagination* Dave Camlin, 2023-08-08 In a world facing multiple existential crises music might be seen as little more than a distraction However in this synthesis of ideas developed over a decade a timely reappraisal of the potential of musicing for human flourishing is presented emphasising its role in the history of human evolution alongside its potential as a resource for sustainable development A holistic philosophy of music is outlined which recognises the complex web of meaning which spreads across complementary musical dimensions of performance and participation whilst emphasising the paramusical benefits which arise from both Highlighting the notion that the social bonds which arise from musicing share much of the neurobiological underpinnings of attachment and love musicing is presented as a resource with the potential for facilitating ethical human connection The humanistic values which are thereby materialised during musicing love reciprocity and justice form the experiential grounds for inhabiting alternative social realities The book addresses how such a holistic philosophy of music might be implemented in practice drawing on the author's professional praxis as a

performer educator community musician composer and researcher in particular their experience of musician education at Sage Gateshead Royal College of Music and Trinity Laban Conservatoire in the UK Beyond Learning Gert J. J. Biesta, 2015-11-17 Many educational practices are based upon ideas about what it means to be human Thus education is conceived as the production of particular subjectivities and identities such as the rational person the autonomous individual or the democratic citizen Beyond Learning asks what might happen to the ways in which we educate if we treat the question as to what it means to be human as a radically open question a question that can only be answered by engaging in education rather than as a question that needs to be answered before we can educate The book provides a different way to understand and approach education one that focuses on the ways in which human beings come into the world as unique individuals through responsible responses to what and who is other and different Beyond Learning raises important questions about pedagogy community and educational responsibility and helps educators of children and adults alike to understand what a commitment to a truly democratic education entails **Politica, by B.
