Community Planning And Conceptions Of Change Dilemmas Of Inner City Planning:

Bowker's Law Books and Serials in Print 1988 R. R. Bowker,1988 Public Space Design and Social Cohesion Patricia Aelbrecht,Quentin Stevens,2019-01-22 Social cohesion is often perceived as being under threat from the increasing cultural and economic differences in contemporary cities and the increasing intensity of urban life Public space in its role as the main stage for social interactions between strangers clearly plays a role in facilitating or limiting opportunities for social cohesion But what exactly is social cohesion how is it experienced in the public realm and what role can the design of city spaces have in supporting or promoting it There are significant knowledge gaps between the social sciences and design disciplines and between academia and practice and thus a dispersed knowledge base that currently lacks nuanced insight into how urban design contributes to social integration or segregation This book brings together scholarly knowledge at the intersection of public space design and social cohesion It is based on original scholarly research and a depth of urban design practice and analyses case studies from a variety of cities and cultures across the Global North and Global South Its interdisciplinary cross cultural analysis will be of interest to academics students policymakers and practitioners engaged with a range of subject areas including urban design urban planning architecture landscape cultural studies human geography social policy sociology and anthropology It will also have significant appeal to a wider non academic readership given its topical subject matter **Environment and Planning** ,1988 Meaning and Action Peter Marris,2022-05-29 First published in 1987 Meaning and Action s central theme is the difficulty of matching an understanding of social problems to effective strategies in a time of endemic fiscal constraints and profound changes in economic structure Peter Marris explores the relationship between the way we conceive problems and the possibilities of action by examining two British policies the National Community Development Project and the redevelopment of London s dockland Drawing on both American and British experiences and policies Marris shows how as community planners and organizers became disillusioned with the assumptions underlying existing policies they searched for a more comprehensive understanding of urban social structure At the same time this understanding became almost impossible to translate into practicable strategies of action The book sets this analysis into a broader framework showing how the pressures of inflation rising taxes and unemployment undermined a liberal conception of urban policy and the supportive context it had provided for more radical improvements It illuminates the ideological dilemma underlying the emergence of the Thatcher and Reagan administrations and the disarray of leftwing political parties The final chapters discuss the alternative new conceptions of social theory that are emerging and examines how the metaphors we use to represent social reality such as structure or reproduction can help or hinder our ability to re integrate meaning and action **Planning Problems of Town, City, and Region** ,1928 Twenty years of city planning progress in the United States by John Nolen 19th p 1 44 **Bulletin of the Public Affairs Information Service** Public Affairs Information Service,1984 *Transforming the City* Marion Orr,2007 A path breaking book the first to examine the
