Community Reconstruction After Earthquake Dialectical Sociology In Action:

Community Reconstruction After an Earthquake Ino Rossi,1993-11-30 Rossi develops a theory of the roles of action social actor and structure sociopolitical resources cultural resources and economic resources in disaster studies using the data on community reconstruction after the 1980 earthquake in Southern Italy as a preliminary test of the theory The focus of the study is not the response during the emergency period which immediately followed the earthquake but the long term recovery and reconstruction of the 44 communities which were officially classified as the most heavily damaged Aspects of the post earthquake industrialization of the region are also considered since the physical reconstruction of the destroyed communities is inevitably connected with their socioeconomic development Rossi outlines and tests a new framework which permits prediction of the different speeds of community reconstruction and provides a dialectic theory of the interrelationship between structural and action principles of social action Rebuilding After Disasters Gonzalo Lizarralde,Cassidy Johnson,Colin Davidson,2009-09-10 Rebuilding After Disasters emphasizes the role of the built environment in the re establishment of lives and sustainable livelihoods after disasters Expert contributors explain the principal challenges facing professionals and practitioners in the building industry *Community Disaster Recovery and Resiliency* DeMond S. Consequently this book offers an ambitious holistic view on the form of NIS arguing that the infrastructural mandate requires a conception of the state that encapsulates themes from both the competition and the welfare states in infrastructure provision
