Community Society And Migration Noneconomic Migration In America:

Community, Society and Migration Patrick C. Jobes, William F. Stinner, John M. Wardwell, 1992-08-03 **Population Change and Rural Society** William A. Kandel, David L. Brown, 2006-10-12 CALVIN L BEALE In considering how to introduce the subject of rural population change in st the 21 Century I nd myself re ecting on my own experience as a demographer for the U S Department of Agriculture When I arrived at the Department the post World War II modernization of farming was well under way Each year my colleague Gladys Bowles and I had the unpopular task of announcing how much the farm population had decreased in the prior year It was hard to say that the phenomenon was someone s fault Dramatic reductions in labor requirements per unit of agricultural output were occurring everywhere and not just in the United States But politically blame had to be assigned and whichever political party was not in the White House was certain to place the blame squarely on the current administration The demographic consequences of this trend were major In a 22 year period from 1941 to 1962 the net loss of farm population from migration and cessation of farming averaged over a million people per year It took eight years after the war before an administration was willing to begin to talk about the need to diversify rural employment By that time farm residents had already become a minority of rural people However well into the 1970s I continued to receive inquiries from people who still equated rural with farm or who could not envision what rural nonfarm people did for a living **The Changing Landscape of Work and Family in the American Middle Class** Elizabeth Rudd, Lara Descartes, 2008-03-14 This collection explores the dynamics of the modern middle class American family and its near constant state of transition The editors introduce the book by situating it within the context of work family and ethnographic research on middle class families in the United States Emerging and established scholars contributed chapters based on their original field research following each chapter with a personal reflection on doing field work The volume concludes with an original essay by Kathryn Dudley an anthropologist who has spent decades studying the intersections of work family and class in American culture As a whole the volume highlights how culture shapes family life amid shifting social and economic landscapes The authors working in the fields of anthropology and sociology observed daily life at workplaces and in homes interviewing people about their work their children and their ideas about what makes a good family They report on their fieldwork in essays rich with the detail of everyday life revealing the fascinating diversity of American middle class families through chapters about gay co father families African American stay at home mothers first time fathers rural refugees from corporate America well off white mothers Taiwanese immigrant churches the fetal ultrasound and more The Changing Landscape of Work and Family in the American Middle Class is an excellent text for classes in anthropology sociology American culture family studies work and family and gender studies **Opting for Elsewhere** Brian Hoey, 2014-12-31 Do you get told what the good life is or do you figure it out for yourself This is the central question of Opting for Elsewhere as the reader encounters stories of people who chose relocation as a way of redefining themselves and

reordering work family and personal priorities This is a book about the impulse to start over Whether downshifting from stressful careers or being downsized from jobs lost in a surge of economic restructuring lifestyle migrants seek refuge in places that seem to resonate with an idealized potential self Choosing the option of elsewhere and moving as a means of remaking self through sheer force of will are basic facets of American character forged in its history as a developing nation of immigrants with a seemingly ever expanding frontier Building off years of interviews and research in the Midwest including areas of Michigan Brian Hoey provides an evocative illustration of the ways these sweeping changes impact people and the communities where they live and work as well as how both react devising strategies for either coping with or challenging the status quo This portrait of starting over in the heartland of America compels the reader to ask where we are going next as an emerging postindustrial society
