Como Acercarse A La Astronomía:

Cómo acercarse a la astronomía Julieta Fierro, 1991 Cómo acercarse a la Astronomía Julieta Fierro, Julieta Fierro Gossman, Consejo Nacional para la Cultura y las Artes (México) . Dirección General de Publicaciones, Querétaro, 1991

Física 1, 2do grado Tambutti, 2003 *Historias de lecturas y lectores* Juan Domingo Argüelles, 2015-01-15 Qué significa leer y cómo y cuándo nace la pasión por los libros. Hasta qué punto la lectura nos transforma como individuos. Pocos intelectuales en México han meditado tanto y de manera tan profunda sobre el tema de la lectura como Juan Domingo Argüelles. Prueba de ello es la gran cantidad de libros que ha consagrado al tema. En la presente obra Juan Domingo entrevista a varias figuras de la cultura nacional: escritores, científicos, editores, investigadores, etc., con el fin de indagar de manera más personal sobre las motivaciones que llevaron a cada uno de los interrogados a convertirse en lector en el sentido más hondo del término. Son conversaciones en las cuales lo anecdótico y las historias de vida se combinan con lo reflexivo. En conjunto, el libro nos ofrece una mirada amena y significativa en torno a la importancia de los libros para la formación individual y el desarrollo social.

Ensayistas de Tierra Adentro, 1994 **Breve historia de la astronomía** Enrique José Díaz León, 2021-02-01 Desde sus más remotos orígenes la humanidad se sintió fascinada por la influencia de los astros en la naturaleza. Desde las más primitivas civilizaciones observamos la búsqueda celeste dibujando constelaciones y escudriñando entre los astros en busca de respuestas sobre nuestra propia existencia. En ese camino colosal y formidable descubrimos el universo y hoy nos sigue enamorando como lo hizo a los primeros hombres que levantaron la vista hacia los cielos más oscuros de todos los tiempos. Esta obra amena y muy divulgativa recoge los principales hitos de la historia de la astronomía y la astronutica. Desde la prehistoria y las primeras civilizaciones como la sumeria, exponente de las primeras culturas urbanas, se adentra en la fascinación de los faraones egipcios por los astros, repasa la historia de la América precolombina para detallar sus conocimientos astronómicos y la relación con sus ritos ancestrales y dibuja un apasionante recorrido por la ciencia e historia astronómica desde la antigua Grecia. La astronomía recorre las luces y sombras del Medioevo hasta los grandes acontecimientos del siglo XX con la mirada puesta hacia el futuro. De qué le sirve a los sabios averiguar los mayores secretos del cosmos si se lo guardan para ellos. Debe haber alguien que nos cuente lo que otros han averiguado. Este es el caso de Enrique Díaz, profesor de comunicación que lleva casi dos décadas dedicándose a dar a conocer los avances de todas las disciplinas científicas en la radio y en sus libros. Lo que Enrique es pasión por la ciencia. Francisco Paz, periodista de Canal Sur Radio. Una cosa es saber y otra saber contarlo. Enrique José Díaz León aunar estos dos saberes porque en él conviven el periodismo, el interés científico y su vocación de contar por el placer de compartir conocimientos. Esencia del periodismo cultural y científico. Manuel Pedraz, RNE. Enrique José Díaz León tiene una forma de comunicar muy buena y amena. Sin abandonar el rigor científico y la documentación previa acerca de la ciencia al gran público. Me gusta su forma de escribir. Una vez empiezas a leerlo no puedes parar hasta llegar al final. Ysabel Manikaentrelibros.com Contemporary Spanish-Speaking Writers and Illustrators for Children and Young Adults Isabel
