## **Compact Peters World Atlas The Earth In True Proportion:**

Hammond Compact Peters World Atlas Hammond World Atlas Corporation, 2002 All maps in this atlas were created on the Peters Projection which preserves area accuracy thus giving an impression of the world quite different from the commonly used Mercator projection maps Some fine features land forms are clearly shown with 3 D effects digital vegetation data from satellite

*Rhumb Lines and Map Wars* Mark Monmonier, 2010-11-15 In *Rhumb Lines and Map Wars* Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator's legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth's roundness As Monmonier shows mariners benefited most from Mercator's projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection's popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography's most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps *Rhumb Lines and Map Wars* is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time

*The Peters World Atlas* Arno Peters, 2002 Finally correcting many long standing misconceptions about the geography of our own planet the Peters World Atlas presents one sixtieth of the Earth's surface as an astronaut's eye view on each double page spread Its unique use of colour and relief is intuitive so jungles are green deserts are brown and mountains appear to bulge out of the page In addition to this 246 thematic maps explore such topics as nature society global rainfall birth control marriage weather status of women employment and military strength among others In full colour

**The Publishers Weekly**, 2003 How Maps Change Things Ward L. Kaiser, 2012-02-29 March 5th 2012 marks the 500th birthday of map maker Gerhard Kremer aka Mercator There are many wishing the Flemish map maker well From blogs to books the man who has shaped for many our world view is celebrated as often as vilified Four centuries later Arno Peters created what many see as a fair view of our world but others see as a distorted or misleading map Across the centuries it is maps that link these men and their impact on current

human activity This landmark book *How Maps Change Things A Conversation About the Maps We Choose and the World We Want* looks at maps by these two men and others This examination goes beyond maps as nouns as tactile objects that show locations and distances Maps are verbs don't be fooled we are told at the outset of *How Maps Change Things* The book examines maps as change agents reflecting intentions and setting agendas stating who has what and who has not What are the messages sent by maps What were Mercator Peters and other map makers setting out to do with each of their creations Ward Kaiser author publisher pastor and historian was instrumental in bringing the Peters Equal Area Map to North America He has been leading the discussion of what maps mean and the power of maps in framing human activities In *How Maps Change Things* Kaiser takes a passionate view of how maps illustrate and influence the significant paths humans pursue Rather than looking for definitive answers Kaiser focuses on asking thought provoking questions What does our world through the view of maps really look like and what does the perspective or frame of reference or bias of the viewer mean to the map and its view Are all maps simply propaganda for the hidden agenda of the map maker What is the world we get and what is the world we want and who cares and why Kaiser has stimulated an impressive and important conversation

[Bibliographic Guide to Maps and Atlases](#), 2003      **Peters World Atlas** Peters Arno, 2010-08-10 Provides physical political and human and economic geography maps of the world in current surface area proportion and includes maps covering such subjects as nutrition demography energy use and health      **Small-Scale Map Projection Design** Frank Canters, 2002-02-21 The use of computers in cartography has made it easier for map makers to transform data from one map projection to another and experiment with alternative representations of geographical data This has created new challenges and opportunities for map projection scientists *Small Scale Map Projection Design* focuses on numerical map projection research and is written from the perspective of the map projection user It demonstrates how advances in the measurement of map projection distortion and in the development of low error map projections can help map makers decide what type of map projection is best for their purpose and shows how they can eventually design their own map projections      **Walford's**
