Companion Animals and Us Anthony L. Podberscek,Elizabeth S. Paul,James A. Serpell,2000-04-13 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human companion animal interactions and relationships This is not surprising considering that pets are kept in at least half of the households in Western societies What then is so special about the relationships people have with their pets Are we very different from our ancestors in the ways we feel about animals What does pet keeping tell us about ourselves and our relationships with people

Can pets be good for our health Do they help promote empathy for other humans These questions and more are explored in this book *Companion Animals and Us* brings together some of the newest research from a wide variety of disciplines including anthropology history psychology sociology human and veterinary medicine This book will make fascinating reading for anyone interested in understanding more about the human pet relationship **The Association Between Companion Animals and Human Health** Wendy J. Moody,1998 Well-Being Over the Life Course Regina M. Bures,Nancy R. Gee,2020-12-14 This book provides a multidisciplinary overview of the impact of human animal interaction on well being from childhood to later life It presents a life course perspective to the study of human animal interaction addressing concepts of family and the role of pets therein as well as the impact of companion animals on child development and successful aging This book fills a gap in the existing literature by framing the study of human animal interaction including the role of animal assisted interventions on well being in a broader social and behavioral context Pets as Sentinels, Forecasters and Promoters of Human Health M. Ramiro Pastorinho,Ana Catarina A. Sousa,2019-11-30 This book provides an up to date overview of the current knowledge and research concerning domestic pets as sentinels forecasters and promoters of human health Written by leading specialists in the fields of medicine veterinary environment analytical chemistry sociology and behavioral science this volume provides a comprehensive understanding of the capabilities of pets in what regards to human health The first seven chapters are devoted to the use of pets as sentinels for their human companions in terms of exposure to different classes of environmental chemicals The following five chapters address the use of pets as models for human diseases and promoters of human health The final two chapters highlight the psycho social and psychophysiological aspects of human animal interactions The book offers an integrated approach to the One Health concept providing in a truly holistic manner tools to assess the equilibrium between the environment men and animals This exercise will highlight and reshape our position towards the planet that despite being a microscopic dot on a microscopic dot lost in the unimaginable infinity of the Universe is still our own At the end of the day pets will always be there to help us *The Role of Companion Animals in Counseling and Psychology* Jane K. Wilkes,2009 The human health benefits derived from relationships with companion animals has attracted an abundance of scientific interest and research However there is a need for theoretical conceptualizations in order to understand the healing benefits of human animal interactions The goal of this book is to seek these answers and the OC howOCO and OC whyOCO companion animals play a role in counseling and psychology In depth semi structured interviews were conducted with three psychologists who use animals in their therapy settings The focus of these interviews was to determine the experiences of having a companion animal present during therapy sessions The results revealed that pets in therapy 1 enhanced the therapeutic alliance relationship 2 revived the therapeutic environment 3 improved professional practice and 4 created a sense of sacredness The therapy animals seemed to provide the trust and safety needed for clients to work within the transitional space and that the animals may act as transitional objects for some

clients This book suggests that therapy animals are extremely helpful in providing a sense of safety for traumatized clients and could act as catalysts especially with defensive and or detached clients Unique features include discussion of the domestication of companion animals research into the human animal bond social and psychological support theory descriptions of methods used object relations theory and Winnicott's Concepts implications for the practice of counseling and psychology professional and ethical considerations and suggestions for future research Replete with informative appendices that will serve as valuable knowledge this book is a significant resource on the subject of animal assisted therapy for mental health professionals such as counselors clinical social workers psychologists and skilled therapists **Low-Cost**

Approaches to Promote Physical and Mental Health Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time space and funds are generally in short supply even under optimal conditions Their participants clients or patients too will admit to similar deficits of time and patience even with optimal motivation Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel Low Cost Approaches to Promote Physical and Mental Health addresses both sides of this shortfall by offering either self administered or easily administered verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding Editor Luciano L Abate continues his long tradition of prolific innovations by identifying major changes in today's health care systems and explaining how targeted prescriptive promotion prevention strategies can enhance traditional primary secondary and tertiary interventions in key behavioral and relational areas Nutrition weight obesity control diets meal planning vitamins and minerals herbal supplements Exercise expressive movement relaxation meditation and mindfulness Writing for mental health promotion from structured protocols workbooks to less structured focused expressive and guided writing including diaries and autobiographies Sex sexuality affection intimacy and fear of intimacy Mother child bonding as well as couple and family togetherness Spirituality and forgiveness in dealing with inevitable life hurts and disappointments Friendships and support groups Plus leading edge interventions including emotional intelligence animal companionship and computer technology Reviews of each promotional approach are engaging effective and consistent with standard psychological practice for lasting results either away from or in addition to non clinical and clinical settings schools hospitals senior citizen centers etc L Abate and his fifty colleagues have designed a future oriented sourcebook for mental and public health professionals who want to maximize their resources and those of their participants The World's Children and Their Companion Animals Mary Renck Jalongo, 2004 *Pet Politics* Susan

Hunter, Richard A. Brisbin, 2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society *Pet Politics* presents the first study of the development of companion animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs

and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals

New Perspectives on Human-Animal Interactions Sarah Knight,Harold Herzog,Rick H. Hoyle,2009-09-01 Animals are important in human psychological and cultural life and our relationships with other species are psychological and morally complicated This special issue presents a series of original research articles concerning attitudes towards animals the ethics of their treatment the effects of companion animals on human health and psychological well being and the role that culture plays in our interactions with other species The articles illustrate the scope of the new field of human animal relationships the variety of research approaches and the implications of research findings for social policy
