Managing Technology Integration for Human Resources in Industry 5.0 Sharma, Naman, Shalender, Kumar, 2023-02-03

Although the transition between the first three industrial revolutions took more than a century Industry 4.0 is progressing quickly. The emergence of digitalization has been rapid thanks to the development of cutting edge technologies. Though we are witnessing this rapid technological decentralization and interconnectivity at present organizations and researchers are already discussing Industry 5.0 where full integration of the human side of business and intelligent systems is expected. In this scenario it is essential to look forward to such strategic workplaces that allow a combination of humans and technology to assure a high degree of automation merged with the cognitive skills of business leaders. Managing Technology Integration for Human Resources in Industry 5.0 provides insights into the impact of the Industrial Revolution 4.0 on human resources. It provides insights for both industry and academia to assist them in teaching and training the next generation leaders through universities and corporate training. Covering topics such as business performance, human technology integration and digitalization, this premier reference source is an essential resource for human resource managers, IT managers, organizational executives and leaders, entrepreneurs, students and educators of higher education, librarians, researchers and academicians.

### **Handbook of Research on Remote Work and Worker Well-Being in the Post-COVID-19 Era**

Wheatley, Daniel, Hardill, Irene, Buglass, Sarah, 2021-04-16. With the introduction of policies to combat COVID 19, far greater numbers of employees across the globe, including those with limited job autonomy, have moved to undertake their entire job at home. Although challenging in the current climate, embracing these flexible modes of work, such as working at home, including relevant investment in technology to enable this, will not only deliver potential organizational benefits but also increase the adaptability of the labor market in the short and longer terms. Although perhaps not the central concern of many in the current climate, good home based work is achievable and perhaps even a solution to the current work based dilemma created by COVID 19 and should be a common goal for individuals, organizations and society. Research also has shifted to focus on the routines of workers, organizational performance and well being of companies and their employees along with reflections on the ways in which these developments may influence and alter the nature of paid work into the post COVID 19 era. The Handbook of Research on Remote Work and Worker Well Being in the Post COVID 19 Era focuses on the rapid expansion of remote working in response to the global COVID 19 pandemic and the impacts it has had on both employees and businesses. The content of the book progresses understanding and raises awareness of the benefits and challenges faced by large scale movements to remote working, considering the wide array of different ways in which the large scale movement to remote working is impacting working lives and the economy. This book covers how different fields of work are responding and implementing remote work along with providing a presentation of how work occurs in digital spaces and the impacts on different topics such as gender dynamics and virtual togetherness. It is an ideal reference book for HR professionals, business
