Leibniz on God and Man in 1686 Ryan Phillip Quandt, 2023-06-05 G W Leibniz s Discourse on Metaphysics is viewed by many scholars as a milestone of his mature thought his first attempt to systematize various stances A lengthier theological work Examination of the Christian Religion written a few months after receives less press While Leibniz s intent for writing the theological piece may be left for speculation Leibniz on God and Man in 1686 demonstrates that there is clear overlap between these two texts Leibniz borrows from the metaphysics and physics of Discourse in his theology and he writes that his metaphysical tract addresses questions on grace God s concurrence with creatures the nature of miracles the cause of sin and the origin of evil the immortality of the soul ideas etc Despite challenges for drawing them close Ryan Phillip Quandt argues that these texts converge in the moral quality of God and man that Leibniz took as the cornerstone of his system in 1686 Discourse coheres in a moral and scientific vision while Examination centers on moral commitments Love of God is their shared ideal

,1926 Communities' Sustainable Experiences Salvatore Di Dio,2024-06-24 THE TRUE DIMENSION OF CITIES IS NOT
SPACE BUT TIME Konstantinos Doxiadis This shift from the spatial dimension to that of time places the focus on the
individual s scale of perception How individuals spend their time shapes and infuses our environments with meaning
influencing social dynamics and cultural values The Next Generation EU project exemplifies this shift by integrating lifestyle
and environmental sustainability into urban planning The goal is to facilitate a just transition to a circular economy
redefining not only the physical layout of cities but also the lived experience of its citizens within these evolving spaces The
evolution from the Citizens Sustainable eXperience to the Communities Sustainable eXperience in the interdisciplinary
research funded by the European Union underscores a significant progression from individual to collective experience UX
rooted in human centered design focuses on optimizing products and environments for personal use and satisfaction CX
expands these principles into the realm of more than human centered design where the focus extends beyond individual
users to include wider community interactions and ecosystems Therefore the shift from UX to CX in urban planning and
design is profoundly ethical It calls for a paradigm that prioritizes collective well being and sustainable development
inclusivity and cooperation
