What Are Remote Jobs Usa From Home:

The Politics of Time Guy Standing, 2023-10-26 Guy Standing's books have over the years pieced together a necessary political and intellectual agenda. His *Politics of Time* is a splendid and timely addition to this body of important work. Yanis Varoufakis: Time has always been political. Throughout history, how we use our time has been defined and controlled by the powerful, and today is no exception. But we can reclaim control, and in this book the pioneering economist Guy Standing shows us how. The ancient Greeks organised time into five categories: work, labour, recreation, leisure, and contemplation. Labour was onerous, whereas leisure was *scholē* and included participation in public life and lifelong education. Since the industrial revolution, our time has been shaped by capitalism; our jobs are supposed to provide all meaning in life; our time outside labour is considered simply time off; and politicians prioritise jobs above all other aspects of a good life. Today we are experiencing the age of chronic uncertainty. Mental illness is on the rise; some people are experiencing more time freedom while many others are having more and more of their time stolen from them, particularly the vulnerable and those in the precariat. But there is a way forward. We can create a new politics of time, one that liberates us and helps save the planet through strengthening real leisure and working together through commoning. We can retake control of our time, but we must do it together.

Cities and Mega Risks Mohammad Aslam Khan, 2022-10-11 This book focuses on the emergence of COVID-19 and climate change as twin mega risks to cities of both developed and developing countries. The work analyses how the pandemic has transformed city functions, promoted remote working, and affected socializing, education, and learning patterns, recreation, as well as shopping and entertainment. It discusses the lessons learned from these two Mega Risks: the evolution of urban patterns and functions in their wake and provides visionary thinking for the improvement of cities from the experiences gained. The COVID-19 Pandemic and climate change are both posing serious threats to cities' future. Together they demand changes in the ways cities function and operate. The work presents a case for a better understanding of the twin mega risks, the magnitude of their impacts, the responses of cities in combating these issues, and planning strategies for preparing, mitigating, and adapting to these and future risks. The book is designed to provide reliable resource materials for a wide audience such as planners, professional practitioners, scientists, students, teachers, and researchers working in various fields including geography, environmental sciences, social sciences, policy, and planning.
