Asian Communication Handbook 2003 Chun Wah Lee, Anura Goonasekera, S. Venkatraman, 2003 **Media, Communication, Culture** James Lull, 2013-05-02 Media Communication Culture offers a bold and comprehensive analysis of developments in the field amidst the effects of postmodernism and globalization James Lull one of the leading scholars in the discipline draws from a wide range of social and cultural theory including the work of John B Thompson Thomas Sowell Nestor Garcia Canclini Anthony Giddens and Samuel P Huntington to formulate a well balanced and highly original account of key contemporary developments worldwide The first edition of Media Communication Culture became a well established introductory text For this new edition coverage has been expanded from six to ten chapters and has been thoroughly updated to include all new developments in the field In his familiar and accessible style Lull brings to life a diverse range of examples and mini case studies which will prove invaluable to the reader These range from the hip hop hybrids of New Zealand s Maori youth and the vastly divergent meaning of race and culture in Brazil and the United States to the global impact of McDonalds and Microsoft Complex theoretical ideas such as globalization symbolic power popular culture ideology consciousness hegemony social rules media audience cultural territory and superculture are explained in a clear and engaging way that challenges traditional understandings By connecting major streams of theory to the latest trends in the global cultural mix the book provides a fresh and unsurpassed introduction to media communication and cultural studies It will prove essential reading for undergraduates and above in the fields of media studies communication studies cultural studies and the sociology of culture **Vertebrate Sound Production and Acoustic Communication** Roderick A. Suthers, W. Tecumseh Fitch, Richard R. Fay, Arthur N. Popper, 2016-04-27 Although the fundamental principles of vocal production are well understood and are being increasingly applied by specialists to specific animal taxa they stem originally from engineering research on the human voice These origins create a double barrier to entry for biologists interested in understanding acoustic communication in their study species The proposed volume aims to fill this gap providing easy to understand overviews of the various relevant theories and techniques and showing how these principles can be implemented in the study of all main vertebrate groups The volume will have eleven chapters assembled from the world s leading researchers at a level intelligible to a wide audience of biologists with no background in engineering or human voice science Some will cover sound production in a particular vertebrate group others will address a particular issue such as vocal learning across vertebrate taxa The book will highlight what is known and how to implement useful techniques and methodologies but will also summarize current gaps in the knowledge It will serve both as a tutorial introduction for newcomers and a springboard for further research for all scientists interested in understanding animal acoustic signals **Handbook of Research on Deconstructing Culture and Communication in the Global South** Okocha, Desmond Onyemechi, Yousaf, Muhammad, Onobe, Melchizedec J., 2023-07-10 There are inequalities in global knowledge production in communication
