**Storied Health and Illness** Jill Yamasaki, Patricia Geist-Martin, Barbara F. Sharf, 2016-07-01 Health and illness are storied experiences that necessarily entail personal cultural and political complexities. For all of us communicating about health and illness requires a continuous negotiation of these complexities and a delicate balance between what we learn about the biology of disease from providers and our own very personal subjective experiences of being ill. *Storied Health and Illness* brings together dozens of noteworthy scholars both established and emerging in a provocative collection that embraces narrative ways of knowing to think about, analyze, and reconsider our own and others' health beliefs, behaviors, and communication. Comprehensive content reflects the editors' substantial research in integrative health, narrative care, and innovative ways of improving well-being and quality of life in personal relationships, healthcare, the workplace, and community settings. Unique narrative approaches to the study of health communication include 14 chapters written by 22 contributors who use engaging stories from their own research or personal experience to introduce and ground foundational communication concepts in healthcare, health promotion, community support, organizational wellness, and other health-related sites of interest. Compelling stories of individuals living with the inherent challenges and unexpected opportunities of mental illness, addiction, aging, cancer, dialysis, sexual harassment, miscarriage, obesity, alopecia, breastfeeding, health threats to immigrant workers, developmental differences, and youth gun violence. 36 Health Communication in Action (HCIA) sidebars that highlight applied research of innovative health communication scholars in their own words and then prompt readers to think more deeply about their own perspectives and experiences. Theorizing Practice boxes that encourage readers to reflect on stories that describe significant experiences in their own and others' lives as they consider assumptions and enlarge their viewpoints in previously unimagined ways. *Communicating Health* Patricia Geist-Martin, 2011-05 [Communicating Health](#) Patricia Geist-Martin, Eileen Berlin Ray, Barbara F. Sharf, 2003 **Health Communication in Practice** Eileen Berlin Ray, 2005-03-23 *Health Communication in Practice: A Case Study Approach* offers a comprehensive examination of the complex nature of health-related communication. This text contains detailed case studies that demonstrate in depth applications of communication theory in real-life situations. With chapters written by medical practitioners as well as communication scholars, the cases included herein cover a variety of topics, populations, contexts, and issues in health communication, including provider-recipient communication and its importance to subsequent diagnosis and treatment decision-making, social identity, particularly how people redefine and renegotiate their social identity, communication dynamics within families and with health care providers through unexpected health situations, delivery of health care, and health campaigns designed to disseminate health-related information and change behaviors. Reflecting the changes in health communication scholarship and education over the past decade, chapters also explore current topics such as delivering bad news, genetic testing, intercultural communication, grieving families, and international health campaigns. A list of relevant

concepts and definitions is included at the end of each case to help students make connections between the scenario and the communication theories it reflects With its breadth of coverage and applied practical approach this timely and insightful text will serve as required reading in courses addressing the application of communication theory in a health related context
