Tensions and Barriers in Improving Maternity Care Ruth Deery, Deborah Hughes, Mavis Kirkham, 2010 We have written this book because the story it tells warrants a wide audience We see the purpose of this book as informing discussion and decision making around reconfigurations of maternity care so that planning communication management and recruitment can be improved and shared vision articulated and understood A Throughout the world women centred care is gaining prominence in providing maternity care Many birth centres open each year to meet this need but at the same time many close or are shelved So why should the turnover in organisations that deliver such a vital service to women be so high thwarting many midwives from practising as they would wish This carefully researched and passionate book tells the story of a birth centre that did fail and the painful but valuable lessons it presents for others Many of the issues and behaviours illustrated lack of leadership support vision and plain dealing and tensions between bureaucracy and women centred care will find resonance in maternity services and midwifery experiences in the UK and throughout the world Tensions and Barriers in Improving Maternity Care is a vital and challenging resource for all midwives managers and policy makers and shapers with an interest in maternity and women centred care A remarkably detailed analysis of the politics of a birth centre trapped in a medicalised system that threatened and rapidly destroyed it It is a vivid example of how

Lay, 2000 What roles should midwives play within our healthcare system Must they have certified degrees and be under the jurisdiction of a professional board Do notions of gender create competition and erect barriers between the medical professions The Rhetoric of Midwifery offers new insights into understanding these questions within the context of our present day medical system As a point of departure Mary M Lay analyzes the public discussion over non academically trained or direct entry midwives within Minnesota From 1991 1995 that state held public hearings about the possible licensing of traditional midwives Lay focuses on these debates to examine the complex relationships of power knowledge and gender within the medical profession Lay examines the hearings and provides a framework for appreciating the significance of these debates She also details the history of midwifery highlighting ongoing concerns that have surfaced ever since the profession was created centuries ago In the remaining chapters she focuses on the key testimonies offered during the debates Capturing the actual testimony of midwives home birth parents nurses physicians and attorneys The Rhetoric of Midwifery reveals how the modern medical profession seeks to claim authority about birth Lay bolsters her argument by culling from such sources such as historical documents an internet discussion group and conversations with modern midwives As our medical healthcare system continues to undergo convulsive change The Rhetoric of Midwifery will continue to enlighten challenge and inform

Midwifery and the Medicalization of Childbirth Edwin Van Teijlingen, 2000 This book provides an introduction to the sociological study of midwifery The readings have been selected to highlight the interplay between midwifery and medicine reflecting the medicalisation of childbirth It highlights the major themes in both a historical and a current context as well as western and non western societies Two major themes underlie the organisation of this book that the conception of midwifery must be broadened to encompass a sociological perspective and that the ongoing trend toward the medicalisation of midwifery is crucial to an understanding of the historical current and future status of midwifery By medicalisation of childbirth and midwifery is meant the increasing tendency for women to prefer a hospital delivery to a home delivery the increasing trend toward the use of technology and clinical intervention in childbirth and the determination of medical practitioners to confine the role played by midwives in pregnancy and childbirth if any to a purely subordinate one
