## **Communicating National Integration Empowering Development In African Countries:**

**Communicating National Integration** Osabuohien P. Amienyi, 2016-12-05 This book addresses the negative impact of social cleavages on the development of many African countries. It proposes new ideas on how the development crisis in Africa may be addressed by conceptualizing the underlying problem as a communication issue. In contrast to the frequent neglect of this key factor, this book provides a provocative discussion of how communication strategies can help to promote national integration and social economic and political development. It argues that the activities associated with the communication of national integration must be seen as an all encompassing task that transcends official speeches in attempts to persuade a disparate population to cultivate national consciousness. Such activities must encompass efforts to persuade leaders to eliminate policies that seek to promote spatial dislocation and cross cultural interaction and to arouse the audience to pay closer attention to integrative messages disseminated through the mass media. **Multidisciplinary Issues Surrounding**

**African Diasporas** Onyebadi, Uche T., 2019-10-04 Members of diasporic populations often have a unique dual persona consisting of one's migrant role as a permanent or transient member of a new country and one's role as a citizen of one's home country. Like all diaspora, the African diaspora is further composed of sub groups of people of a variety of backgrounds and disciplines such that there is a need for studies that properly encompass and address the African diaspora across a multitude of fields and pedagogies including architecture, education and business. **Multidisciplinary Issues Surrounding African Diasporas** is a pivotal reference source that explores the philosophical and epistemological issues regarding the African diaspora identity and navigates these individuals' opportunities for professional and academic growth. Featuring coverage on a wide range of topics such as higher education, cultural engagement and xenophobia, this publication is ideally designed for sociologists, anthropologists, humanities scholars, political scientists, cultural studies academicians, university board members, researchers and students. *Popular Geopolitics and Nation Branding in the Post-Soviet Realm* Robert A.

Saunders, 2016-07-07 This seminal book explores the complex relationship between popular geopolitics and nation branding among the Newly Independent States of Eurasia and their combined role in shaping contemporary national image and statecraft within and beyond the region. It provides critical perspectives on international relations, nationalism and national identity through the use of innovative approaches focusing on popular culture, new media, public diplomacy and alternative narrators of the nation. By positing popular geopolitics and nation branding as contentious forces and complementary flows, the study explores the tensions and elisions between national self image and external perceptions of the nation and how this complex interplay has become integral to contemporary global affairs.
