Communication Incompetencies A Theory Of Training Oral Performance Behavior:

Communication Incompetencies Gerald M. Phillips, 1991 Gerald M Phillips draws on his twenty five year five thousand client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of inept communication behavior That experience has convinced Phillips that communication is arbitrary and rulebound rather than a process of inspiration He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern Regardless of the source of error the remedy is to train the individual to avoid or eliminate errors thus orderly procedure will result in competent performance Inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language without which our discourse becomes incomprehensible

The Dark Side of Close Relationships Brian H. Spitzberg, William R. Cupach, 2013-06-17 This collection of essays represents a follow up to the editors 1994 publication *The Dark Side of Interpersonal Communication* In the preface to that collection of essays they argued that To fully understand how people function effectively requires us to consider how individuals cope with social interaction that is difficult problematic challenging distressing and disruptive In this companion volume the focus expands from social interaction to close relationships Aside from the inherent need to investigate the bad as well as the good of interpersonal relationships the editors and their colleagues simply find the dark side metaphor to be intellectually arousing It stimulates investigation of important yet often neglected phenomena and it especially encourages consideration of the hidden and forbidden and the paradoxical and ironic elements of human relating This volume assembles the cutting edge work of first rate scholars from the ranks of communication psychology sociology and cognate disciplines As in the previous text the subject matter and stylistic approaches are diverse reflecting the broad and interdisciplinary domain that is the dark side of human affairs The selection of topics is somewhat selective reflecting only a sample of emerging scholarship in the interdisciplinary study of relationships These internationally recognized scholars examine various topics related to the dark side including fatal attractions jealousy and envy misunderstanding gossip conflict codependence sexual coercion stalking relationship termination unrequited love and mental health problems in relationships Some chapters present original data and models whereas others reconfigure the way in which the understandings of relationships can be better understood In addition the bookend chapters examine the ideology nature and problems of dark side scholarship Collectively the scholarly journeys made in this volume are intended to illustrate the complexities both moral and functional involved in close relationship processes The intent is neither to valorize nor demonize the darker aspects of close relationships but rather to emphasize their importance to the day to day doing of relationships Only by accepting such processes as integral to relationships can their role be fully understood
