Communication Patterns In The Presidential Primaries A Twentieth Century Perspective:

The Primary Decision William L. Benoit, 2001-12-30 Benoit and his colleagues apply the functional theory of political campaign discourse to 25 presidential primary debates beginning with the 1948 American presidential primary campaign. They conclude with the 2000 presidential primaries. They identify the functions, topics, and targets of attacks and the results are compared with research on primary TV spots and with general debates. An important resource for scholars and students of American presidential and party elections and political communications.

Videostyle in Presidential Campaigns Anne Johnston, Lynda Kaid, 2000-10-30 Since 1952 when Eisenhower's media consultants decided they could warm up the General's personality and overcome selective exposure by using short spots on television, advertising has played a major role in American presidential campaigns. By the late 1990s, candidates and their political parties spend hundreds of millions on TV ads. Political spots have become the dominant form of communication between voters and candidates. Kaid and Johnston report the results of a systematic and thorough analysis of virtually all of the political commercials used in general election campaigns from 1952 through the 1996 presidential contest. Important to scholars, students, and other researchers involved with political communications, mass communications, and presidential elections.

Political Communication Ethics Robert E. Denton Jr., 2000-05-30 This essay collection examines ethical concerns related to the traditional areas of political communication, including campaigns, media discourse, and advertising, as well as new technologies including the Internet. In total, the collection provides one of the few volumes to examine political ethics from an academic perspective rather than from a moralistic or rule orientation. Bruce Gronbeck provides an assessment of presidential campaigns, arguing that ethical judgments of citizens are based on candidates' actions and motives, character, and competence. Ronald Lee explores the ethics of campaign discourse and charts the relationship between presidential candidates' projection of civic virtue and the political arrangements that dictate the course of the campaign itself. Steven Goldzwig and Patricia Sullivan examine what happens to discourse when the divide between the haves and have-nots translates into a local community disconnected from virtual politics. The nature, types, and impact of the growing use of hate speech in contemporary politics is explored by Rita Whillock, while Robert Denton investigates television as an instrument of governing and its impact on the nature of democracy. Gary Woodward looks at the ethics of political journalism, and Lynda Lee Kaid analyzes the ethical issues raised by political advertising in all forms. Clifford Jones looks at the impact of campaign finance rules on campaign communication strategy. Gary Selnow explores the ethics of politics on the Internet, and Robert Denton concludes by examining the relationship between constitutional authority and public morality. An important text for students as well as scholars investigating contemporary American politics.

The Rhetoric of First Lady Hillary Rodham Clinton Colleen Kelley, 2001-01-30 Kelley provides an examination of Hillary Rodham Clinton's rhetorical responses to mediated versions of crises in the Clinton Administration. She begins by examining the historical First Lady and then looks at mediated political

realities in general as well as those of the Clinton presidency Kelley also examines the rhetorical management of political crises and the crises management style of First Ladies including Florence Harding and Eleanor Roosevelt The book focuses on the analysis of Hillary Rodham Clinton s rhetorical management of crises in her husband s Administration including health care Travelgate Whitewater and allegations of sexual misconduct Kelley s approach is grounded in Kenneth Burke s framework of language as a symbolic means of inducing cooperation through rhetorical identification She concludes with speculation regarding both the degree of success of Hillary Clinton s efforts as well as the implications of those efforts to rhetorical and political communication and feminist theory This book will be of particular interest to scholars and researchers of the presidency and the role of the First Lady political communication and feminist studies With Malice Toward All?

Patricia Moy, Michael Pfau, 2000-04-30 Public opinion polls point to a continuing decline in confidence in the Presidency court system Congress the news media state government public education and other key institutions Moy and Pfau analyze the reasons for this crisis of confidence with particular attention to the role of the media Moy and Pfau examine the impact of sociodemographic factors political expertise and use of communication media on people s perceptions of confidence in democratic institutions Their conclusions are based on two years of data collection In three waves between 1995 and 1997 they conducted a series of content analyses of media depictions of democratic institutions in conjunction with general survey data The result is one of the most comprehensive examinations ever conducted on the influence of the media on public confidence It will be of great value to scholars researchers students and professionals in government and the media **The**

Idea of Political Marketing Nicholas O. O'Shaughnessy, Stephan C.M. Henneberg, 2002-06-30 O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics Particular attention was paid to the theory of political marketing with conceptual definitions developed to better facilitate communication between marketing professionals and political science researchers Political marketing is about the making and unmaking of governments in a democracy Despite its growing importance the marketing academic profession has shown very little interest in the political ramifications of their discipline while political scientists often come to political marketing with the view that it is cosmetic if not trivial O'Shaughnessy Henneberg and their contributors examine how the theory and practice of marketing has been and can be applied to politics As they show elections are a persuasion task writ large most especially with the demise of inherited class loyalties Following elections governments can employ marketing techniques to build support for their actions while opposition parties can press the government and its supporters through similar marketing approaches Of particular interest to scholars researchers and policy makers involved with politics political communication and the making of public policy The Clinton Scandals and the Politics of Image Restoration Joseph R.

Blaney, William L. Benoit, 2001-02-28 President Bill Clinton has been more than generous Blaney and Benoit point out in providing fodder for examination of image restoration in politics His accusers have also done their part in making the public

aware of the president's real and perceived shortcomings. As the authors detail, Bill Clinton has been the subject of a tremendous if not unprecedented amount of scrutiny by his personal and political enemies. Blaney and Benoit systematically review the background of the various scandals that have marred the Clinton presidency. They concentrate on the techniques used to advance the various accusations and the approaches taken by the president and his supporters to deflect the attacks. All scholars and researchers interested in political communication and rhetoric in contemporary American politics and the presidency will find this to be essential reading.

Navigating Boundaries Brenda Marshall, Molly A. Mayhead, 2000-06-30
 Marshall Mayhead and their contributors explore the discourse women use to negotiate political boundaries. The analysis based on the study of five governors: Nellie Tayloe Ross, Martha Layne Collins, Ann Richards, Barbara Roberts, and Christine Todd Whitman, illustrates that women bring issues of caring, empowerment, family, and inclusivity to the office. These issues contrast sharply with traditional male-centered ideologies and give renewed vigor to a revised moral point of view in contemporary politics. The essays also demonstrate that women governors must still work within the traditional societal constructs for women. Yet at the same time, they need to create new paradigms that redefine women's roles and exemplify that woman's place is in the private sphere and the public political arena. The work examines the common obstacles these women faced despite differences in era, political affiliation, geographic location, and ideologies. Simply by being elected, each woman operated within a public-private sphere duality she struggled to overcome. Each woman recognized that she needed to craft appropriate rhetorical strategies to succeed in office while not abandoning the unique values and perspectives she brought to the statehouse. The essays contend that women serving in the governorship resculpt the face of the office, restructure the political landscape, and redefine women's roles. The volume will be of particular value to students and scholars dealing with issues of public address and rhetorical criticism.

When Congress Debates Theodore F. Sheckels, 2000-09-30
 Sheckels provides the first book-length study of Congressional debating. The limited work on the topic in the communication discipline has argued that such debating is tedious and inconsequential. Sheckels, however, offers a new paradigm derived from the work of Mikhail Bakhtin that counteracts this assumption. This paradigm also counters the often unvoiced assumption that debates are inherently bipolar with the initial premise that they are instead polyphonic. The polyphony, however, goes beyond the recognition of the multiple speakers who participate and the drama they enact to the awareness of the voices these speakers introduce within their discourse. These voices range from the words of authorities to the narratives of average Americans, from classical prosopopoeia to what Bakhtin terms stylization. Speakers also sometimes enact what Bakhtin terms double-voiced discourse. Furthermore, there are moments of what Bakhtin terms carnivalesque energy. Bakhtin's work finally alerts the critic to the illusion of finalizability in Congressional debates. After outlining this paradigm, Sheckels uses it to examine six Congressional debates ranging in date from a 1960 Senate filibuster on a civil rights matter to the 1999

House debate on articles of impeachment and includes analyses of such flash points as the Confederate flag sexual harassment in the military and partial birth abortion These case studies reveal both the utility and the flexibility of the Bakhtinian perspective Thoughtful analyses that will be of great interest to scholars and researchers involved with rhetoric and political communication
