## **Communication Skills For Conservation Professionals:**

*Communication Skills for Conservation Professionals* Susan Kay Jacobson, 1999-06 Community and public support are essential to the success of conservation and resource management programs. Often the level of support received depends on whether or not the goals and importance of the program have been clearly explained to the public, the press, or policymakers. Without good communication, even the best programs are liable to fail. *Communication Skills for Conservation Professionals* provides in-depth guidance on achieving conservation goals through better communications. It introduces communication approaches, marketing, and mass media citizen participation, public information, environmental interpretation, and conservation education activities, and offers scores of real-world examples and straightforward advice that will help conservationists develop the skills they need to communicate effectively. Following an introductory chapter that provides an overview of the communication process, the book describes research techniques for gathering background information and targeting audiences, outlines the steps involved in developing a communications campaign, explains how to use mass media from giving interviews to writing news releases and holding press conferences, provides examples for developing interpretive media for conservation, explores long-term conservation education strategies, presents program evaluation techniques to determine the level of success achieved or to identify steps for improvement. Throughout, the author presents a rich storehouse of examples, guidelines, and planning tools for all kinds of communication challenges. Strategies and materials that have been used by organizations across the country, from the U.S. Fish and Wildlife Service to The Nature Conservancy, from Adirondack Park to Yellowstone National Park, are featured, providing both inspiration and support for others involved with similar projects. *Communication Skills for Conservation Professionals* is a much-needed contribution to the environmental literature that will play a vital role in helping scientists, managers, concerned citizens, and students to more effectively communicate their knowledge and concern about the environment and to achieve greater professional and community success with their environmental campaigns. **Notes**, 2000

**The Conservation Professional's Guide to Working with People** Scott A. Bonar, 2012-09-26 Written in an entertaining, easy-to-read style, *The Conservation Professional's Guide to Working with People* fills a gap in conservation education by offering a practical how-to guide for working effectively with colleagues, funders, supervisors, and the public. The book explores how natural resource professionals can develop skills and increase their effectiveness using strategies and techniques grounded in social psychology, negotiation, influence, conflict resolution, time management, and a wide range of other fields. **Interpretive Solutions** Michael E. Whatley, 2011-02-15 *Interpretive Solutions* will help you harness the power of interpretive communications to improve critical resource protection issues and situations. Matching the right communications approach with the audience most in need of being reached can play a pivotal role in whether a situation stabilizes, improves, or worsens. Appropriate communications can make a positive difference in the role people play in helping to achieve desired resource protection outcomes and results. *Interpretive*
