developed Portability transformed the media landscape forever Blogging given birth to a new generation of citizen journalists In 2012 there were about 59 4 million WordPress sites across the world and they received 3 5 billion views in all Other content creation forms are gaining more and more popularity as well Wikipedia has more than 4.5 million English language entries all user generated and user edited All these platforms enable to share own content Anyone can become an author in these times publish articles and share own content Though news organizations get millions of eyes and ears on the ground citizen journalists present a host of challenges for media outlets Citizen contributions pose a difficult time consuming and potentially risky process for publications In Search of a European Public Sphere Malgorzata Winiarska-Brodowska, 2020-03-24 This collection is up to date and vital at the present moment which demands a special sense of responsibility regarding the tasks ahead for Europe especially in the fields of media and communication The volume adopts a wide range of approaches to the European public sphere and provides much needed insight into both Western and Eastern perceptions of events and processes in Europe The contributions here analyse recent trends in media and communication such as misinformation fragmentation and the core periphery division and search for possible ways to approach them In doing so they discuss a number of important current issues such as populism migration and foreign involvement in European affairs The volume also sheds light on the question of how the changes in communication environments affect the public spheres in Europe Focusing on media in Europe the contributors bring knowledge from different scientific fields including geopolitics sociology political science and philosophy and represent different geographic regions whilst at the same time presenting a European perspective on the issues they investigate The Routledge Handbook of Critical Public Relations Jacquie L'Etang, David McKie, Nancy Snow, Jordi Xifra, 2015-08-11 Critical theory has a long history but a relatively recent intersection with public relations This ground breaking collection engages with commonalities and differences in the traditions whilst encouraging plural perspectives in the contemporary public relations field Compiled by a high profile and widely respected team of academics and bringing together other key scholars from this field and beyond this unique international collection marks a major stage in the evolution of critical public relations It will increasingly influence how critical theory informs public relations and communication The collection takes stock of the emergence of critical public relations alongside diverse theoretical traditions critiques and actions methodologies and future implications This makes it an essential reference for public relations researchers educators and students around a world that is becoming more critical in the face of growing inequality and environmental challenges The volume is also of interest to scholars in advertising branding communication consumer studies cultural studies marketing media studies political communication and sociology **Public Spheres of Resonance** Anne Fleig, Christian von Scheve, 2019-10-08 To understand the profound changes in the modes of public political debate over the past decade this volume develops a new conception of public spheres as spaces of resonance emerging from the power of language to affect and to ascribe and instill

collective emotion Political discourse is no longer confined to traditional media but increasingly takes place in fragmented and digital public spheres At the same time the modes of political engagement have changed discourse is said to increasingly rely on strategies of emotionalization and to be deeply affective at its core This book meticulously shows how public spheres are rooted in the emotional bodily and affective dimensions of language and how language in its capacity to affect and to be affected produces those dynamics of affective resonance that characterize contemporary forms of political debate It brings together scholars from the humanities and social sciences and focuses on two fields of inquiry publics politics and media in Part I and language and artistic inquiry in Part II The thirteen chapters provide a balanced composition of theoretical and methodological considerations focusing on highly illustrative case studies and on different artistic practices The volume is an indispensable source for researchers and postgraduate students in cultural studies literary studies sociology and political science It likewise appeals to practitioners seeking to develop an in depth understanding of affect in contemporary political debate **EU Citizens in the European Public Sphere** Stefanie Walter, 2016-07-20 Stefanie Walter examines the visibility of European Union citizens in the mass mediated European public sphere and argues that it can help facilitate an exchange between decision makers and ordinary citizens The results show that in comparison to other actor groups such as political parties or civil society organisations the visibility of European Union citizens is not marginal Yet the image of the European Union citizenry that becomes visible via the news media remains nationally entrenched and references to a truly European citizenry are rare The study also uses multilevel regressions to explain the visibility of European Union citizens in the news coverage The empirical analyses are based on a large scale content analysis of TV news and newspaper articles of the 2009 European Parliament election p Dictionary of Media and Communication Studies James Watson, Anne Hill, 2006-05-26 No student of media communication and cultural studies can afford to be without the new edition of Watson and Hill

Communication Rights in Africa Tendai Chari, Ufuoma Akpojivi, 2023-09-01 This ground breaking volume examines enduring and emerging discourses around communication rights in Africa arguing that they should be considered an integral component of the human rights discourse in Africa Drawing on a broad range of case studies across the continent the volume considers what constitutes communication rights in Africa who should protect them against whom and how communication rights relate to broader human rights While the case studies highlight the variation in communicative rights experiences between countries they also coalesce around common tropes and practices for the implementation and expression of communication rights Deploying a variety of innovative theoretical and methodological approaches the chapters scrutinise different facets of communication rights in the context of both offline and digital communication realities The contributions provide illuminating accounts on language rights digital exclusion digital activism citizen journalism media regulation and censorship protection of intellectual property rights politics of mobile data and politicisation of social media This is the first collection to consider communication in Africa using a rights based lens The book will appeal to researchers academics
