Liu Wen, 2020-10-25 Sino US relation that has great influence on international relations is considered as the most important bilateral relation in the world today by politicians and scholars from both of the two countries. The development of Sino US relation has undergone twists and turns since the two countries established diplomatic relation. Although China and America has developed cooperative relationship in various areas, critical events resulted from conflicts happen from time to time. Media that plays various roles including message transmitter, public opinion shaper and problem solver during the two countries crisis is not only an important information channel for both the government and the people to learn about the crisis quickly but also undertakes certain diplomatic duties like indicating attitude, explaining policy and setting agenda. This book is an analysis of the features and laws of media coverage on critical events between China and America, discussing their influence on public opinion of American people as well as the decision making progress of American government by study the related reports of New York Times since 1990. This book takes some China US crisis as study cases and the related reports in New York Times as researching sample, analyzing the quantity, length, type, information source inclination towards China and news frame of the reports, discussing the features and laws of media coverage on crises between China and America. The ultimate purpose is to figure out the role and function of media during the decision making process of America's China policy and to conclude the inspiration for both countries diplomacy and international communication. Strategic Narratives

Alister Miskimmon, Ben O'Loughlin, Laura Roselle, 2014-02-18 Communication is central to how we understand international affairs. Political leaders, diplomats and citizens recognize that communication shapes global politics. This has only been amplified in a new media environment characterized by Internet access to information, social media and the transformation of who can communicate and how. Soft power, public diplomacy 2.0, network power: scholars and policymakers are concerned with understanding what is happening. This book is the first to develop a systematic framework to understand how political actors seek to shape order through narrative projection in this new environment. To explain the changing world order, the rise of the BRICS, the dilemmas of climate change, poverty and terrorism, the intractability of conflict, the authors explore how actors form and project narratives and how third parties interpret and interact with these narratives. The concept of strategic narrative draws together the most salient of international relations concepts including the links between power and ideas, international and domestic and state and non state actors. The book is anchored around four themes: order, actors, uncertainty and contestation. Through these Strategic Narratives shows both the possibilities and the limits of communication and power and makes an important contribution to theorizing and studying empirically contemporary international relations. Global Communications, International Affairs and the Media Since 1945 Philip Taylor, 2002-11-01. In *Global Communications, International Affairs and the Media since 1945*, Philip M. Taylor traces the increased involvement of the media in issues of peace and especially war from the nineteenth century to the present day. He analyzes the nature, role, and impact of communications within the international arena since 1945 and how communications interacts with foreign policy in practice rather than in theory. Using studies which include the Gulf War and Vietnam, Taylor details the contemporary problems reporting while at the same time providing a comprehensive historical context.

**The International Politics of Communication** Alan Chong, 2025-03-18. In an era of globalization, international communication constantly takes place across borders, defying sovereign control as it influences opinion. While diplomacy between states is the visible face of international relations, this informal diplomacy is usually less visible but no less powerful. Information politics can be found in propaganda, Internet politics, educational exchanges, tourism, and even popular film. *The International Politics of Communication* examines this informational dimension of international politics, investigating how information is generated, conveyed through channels, and directed specifically at audiences. While citizens are often portrayed as faithfully loyal supporters and beneficiaries of the modern nation-state, a fiction supported by passports, identification papers, and other notarized credentials, they are subject to the pulls of loyalty from transnational tribal affiliations, mythological and historical narratives of ethnicity, as well as the transcendental claims of religion and philosophy. Increasingly, social media also enchants non-state individuals, providing new virtual communities as the center of loyalties rather than national affiliations. By reinterpreting taken-for-granted concepts in journalism, media

political economy nationalism development and propaganda as information politics this book prepares serious minded scholars citizens politicians and social activists everywhere to understand the power plays in international communication and use alternatives to begin transforming power relations
