Communication Disorders In Older Peoples Mental Health:

Communication Disability in the Dementias Karen Bryan, Jane Maxim, 2006-03-30 This book focuses on language and communication issues with older people with mental health problems. Radically revised and updated from the authors' earlier book *Communication Disability and the Psychiatry of Old Age*, this book recognizes that language and communication is not just the business of speech and language therapy but is relevant to all staff involved with people who have mental health difficulties. This book focuses on what older people with mental health difficulties require to maintain their independence and to minimize the effects of degenerative disease processes for as long as possible from a speech and language perspective. Relevant to all members of the multidisciplinary team involved within older people's mental health services. Each chapter is evidence based and factual. Reflects the substantial advances in the diagnosis and treatment of dementias. **Community Mental Health for Older People** Gerard Byrne, Christine Neville, 2010 *Community Mental Health for Older People* is the perfect resource for mental health workers as it discusses the ageing population within the context of community mental health. It provides a comprehensive overview of the important issues and clinical practices that influence mental health care for older people. Written from a multidisciplinary perspective, it is suitable for all health workers in community mental health teams: Aboriginal and Torres Strait Islander health workers, clinical psychologists, consumer representatives, medical practitioners, occupational therapists, registered nurses, social workers, etc. as it incorporates the use of case studies to aid in the application of evidence based practice. Multidisciplinary approach serves to illustrate the breadth and context of mental issues for older people. Chapters are topical and relevant, discussing issues such as service provision, cultural and rural issues, major disorders and interventions, as well as ethical and legal issues. Vignettes are included throughout the clinical chapters and serve to illustrate real cases derived from practice. Evidence based practice is a key element to this pivotal new text as it highlights the best method of practice in a clear and accessible manner. Highly readable style without the bulkiness of excessive references. Counseling Older People Charlene M. Kampfe, 2015-01-12 This book provides insight into the primary issues faced by older adults, the services and benefits available to them, and the knowledge base, techniques, and skills necessary to work effectively in a therapeutic relationship. Dr. Kampfe offers empirically and anecdotally based strategies and interventions for dealing with clients' personal concerns and describes ways counselors can advocate for older people on a systemic level. Individual and group exercises are incorporated throughout the book to enhance its practicality. Topics covered include an overview of population demographics and characteristics, counseling considerations, and empowering older clients, successful aging, mental health and wellness, common medical conditions, multiple losses and transitions, financial concerns, elder abuse, veterans issues, sensory loss, changing family dynamics, managing Social Security and Medicare, working after retirement, age retirement transitions, losses and gains, residential options, and death and dying.
