## **Communication Networks A First Course:**

**Communication Networks** Jean Walrand, 1998 Designed for second and third year undergraduates in computer science and electrical engineering or computer science as well as network professionals this book explains the operating principles of local networks the Internet and Asynchronous Transfer Mode networks

**Communication Networks** Jean Walrand, Shyam Parekh, 2022-05-31 This book results from many years of teaching an upper division course on communication networks in the EECS department at the University of California Berkeley It is motivated by the perceived need for an easily accessible textbook that puts emphasis on the core concepts behind current and next generation networks After an overview of how today's Internet works and a discussion of the main principles behind its architecture we discuss the key ideas behind Ethernet WiFi networks routing internetworking and TCP To make the book as self contained as possible brief discussions of probability and Markov chain concepts are included in the appendices This is followed by a brief discussion of mathematical models that provide insight into the operations of network protocols Next the main ideas behind the new generation of wireless networks based on LTE and the notion of QoS are presented A concise discussion of the physical layer technologies underlying various networks is also included Finally a sampling of topics is presented that may have significant influence on the future evolution of networks including overlay networks like content delivery and peer to peer networks sensor networks distributed algorithms Byzantine agreement source compression SDN and NFV and Internet of Things

**Communication Networks** Walrand, 1991-05-01 *A First Course in Information Theory* Raymond W. Yeung, 2012-12-06 A First Course in Information Theory is an up to date introduction to information theory In addition to the classical topics discussed it provides the first comprehensive treatment of the theory of I Measure network coding theory Shannon and non Shannon type information inequalities and a relation between entropy and group theory ITIP a software package for proving information inequalities is also included With a large number of examples illustrations and original problems this book is excellent as a textbook or reference book for a senior or graduate level course on the subject as well as a reference for researchers in related fields

*A First Course in Digital Communications* Ha H. Nguyen, Ed Shwedyk, Edward Shwedyk, 2009-05-28 A concise introduction to the core concepts in digital communication providing clarity and depth through examples problems and MATLAB exercises Its simple structure maps a logical route to understand the most basic principles in digital communication and also leads students through more in depth treatment with examples and step by step instructions

*A First Course in Network Science* Filippo Menczer, Santo Fortunato, Clayton A. Davis, 2020-01-30 Networks are everywhere networks of friends transportation networks and the Web Neurons in our brains and proteins within our bodies form networks that determine our intelligence and survival This modern accessible textbook introduces the basics of network science for a wide range of job sectors from management to marketing from biology to engineering and from neuroscience to the social sciences Students will develop important practical skills and learn to write code for using networks in their areas

of interest even as they are just learning to program with Python Extensive sets of tutorials and homework problems provide plenty of hands on practice and longer programming tutorials online further enhance students programming skills This intuitive and direct approach makes the book ideal for a first course aimed at a wide audience without a strong background in mathematics or computing but with a desire to learn the fundamentals and applications of network science

**A First Course in Graph Theory and Combinatorics** Sebastian M. Cioabă, 2009-05-15 The concept of a graph is fundamental in mathematics since it conveniently encodes diverse relations and facilitates combinatorial analysis of many complicated counting problems In this book the authors have traced the origins of graph theory from its humble beginnings of recreational mathematics to its modern setting for modeling communication networks as is evidenced by the World Wide Web graph used by many Internet search engines This book is an introduction to graph theory and combinatorial analysis It is based on courses given by the second author at Queen's University at Kingston Ontario Canada between 2002 and 2008 The courses were aimed at students in their final year of their undergraduate program

**Communication Networks** Jean Walrand, 1997

*A First Course in Stochastic Models* Henk C. Tijms, 2003-07-22 The field of applied probability has changed profoundly in the past twenty years The development of computational methods has greatly contributed to a better understanding of the theory A First Course in Stochastic Models provides a self contained introduction to the theory and applications of stochastic models Emphasis is placed on establishing the theoretical foundations of the subject thereby providing a framework in which the applications can be understood Without this solid basis in theory no applications can be solved Provides an introduction to the use of stochastic models through an integrated presentation of theory algorithms and applications Incorporates recent developments in computational probability Includes a wide range of examples that illustrate the models and make the methods of solution clear Features an abundance of motivating exercises that help the student learn how to apply the theory Accessible to anyone with a basic knowledge of probability A First Course in Stochastic Models is suitable for senior undergraduate and graduate students from computer science engineering statistics operations research and any other discipline where stochastic modelling takes place It stands out amongst other textbooks on the subject because of its integrated presentation of theory algorithms and applications

**High-performance Communication Networks** Jean Walrand, Pravin Pratap Varaiya, 2000 Retaining the first edition's technology centred perspective this book gives readers a sound understanding of packet switched circuit switched and ATM networks and techniques for controlling them

*Performance Evaluation of Communication Networks* Gary N. Higginbottom, 1998 This volume describes the mathematical methods used to analyze and model the performance of communication networks of all types from simple to complex It addresses traffic on LANs WANs and voice and video networks providing practical methods that can be applied to standards such as ATM The book aims to help readers obtain quick results by presenting efficient solutions to problems These analyses are open to developments by future researchers and the methods can be used to predict design constraints

**Communications Networks: A First Course** Walrand, Understanding Data Communications and Networks William A. Shay, 2004 Thoroughly updated for currency this book offers a clear presentation of data communications and network fundamentals Featuring a wide array of applications the book fully explains concepts and supports them with case studies or descriptions of specific software and other products Students learn the protocols of analog and digital signals data compression data integrity data security local area networks asynchronous transfer mode ATM and much more The third edition includes important information on the latest developments of the Internet

**Fundamentals of Telecommunication Networks** Tarek N. Saadawi, Mostafa H. Ammar, Ahmed El Hakeem, 1994-09-28 This book focuses on the fundamental techniques concepts and mechanisms used in the design development and operation of telecommunication networks Topics covered include Data Communication Fundamentals Network Protocols Architecture and the ISO Reference Model Local Area Network Protocols and Technology Integrated Services Digital Network ISDN Broadband ISDN and more

**First course in data processing with BASIC** J. Daniel Couger, Fred R. McFadden, 1981-01 *Design and Analysis of Computer Communication Networks* Vijay Ahuja, 1982

**Modeling and Simulating Communication Networks** Irene Katzela, 1999 Provides six computer laboratory sessions by which students of network communications can develop a feel for designing networks with complex protocols by changing parameters and seeing the corresponding impact through performance statistics and animations Can be used alone or in conjunction with a standard text on network communications No index or bibliography Annotation copyrighted by Book News Inc Portland OR

**Proceedings of the 2003 International Symposium on Performance Evaluation of Computer and Telecommunication Systems, July 20-24, 2003 Montreal, Quebec, Canada** Mohammad Salameh Obaidat, 2003 Issues for 2011 cataloged as a serial in LC

CASCON '94, 1994 **Real-time Communication with Statistical Performance Guarantees** Chih-Che Chou, 1994
