

Communication & Technology

"Everything that we do is connected, but we are not connected!"
Charles D. Hall, *Los Angeles Times*, 16 October 1999.

Have you noticed that it's no longer enough to be able to do things on your own? That when things don't go just the way you want, or if you get stuck, you have to ask for help? That you can't really follow what someone else is doing unless you look at what they're doing? It's a world where we're all so much more connected, but we're not connected.

Over the last 150 years, technology has had a huge impact on the lives of everyone of us. It's made it so much easier to do things, but it's also made it so much harder to do things. It's made it so much easier to get things done, but it's also made it so much harder to get things done.

Today's technology is still in the shadows, and it's not going to stay there. It's going to come out of the shadows and into the light. It's going to be a part of our lives, and it's going to be a part of our lives. It's going to be a part of our lives, and it's going to be a part of our lives. It's going to be a part of our lives, and it's going to be a part of our lives.

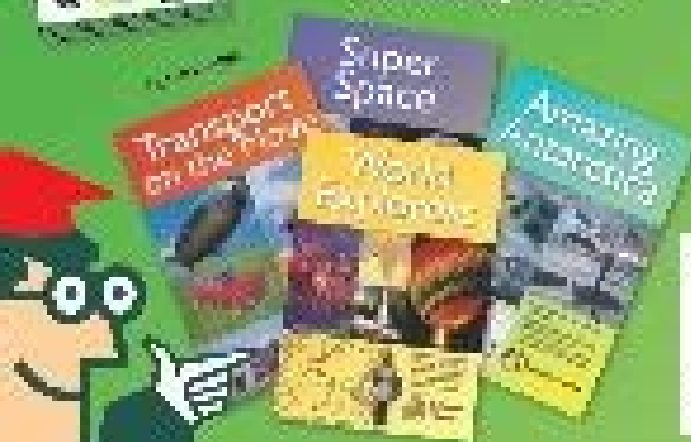

This book is about the way technology is changing our lives. It's about the way technology is changing our lives. It's about the way technology is changing our lives. It's about the way technology is changing our lives. It's about the way technology is changing our lives. It's about the way technology is changing our lives.
