Communication With The Cancer Patient Information And Truth:

Communication with the Cancer Patient Antonella Surbone, Matjaž Zwitter, 1997 In many parts of the world seriously ill patients are not informed of their diagnoses Consequences of this for the patient are not being informed about the therapy and its possible side effects and ultimately deprivation of autonomy Telling the truth to a patient is not simply a matter of providing information Rather the truth is a matter of two way communication the result of a relationship between doctor and patient that develops over time in the context of a given culture In this volume oncologists in different countries give their perceptions of how truth telling is handled in their cultures *Global Perspectives on Cancer* Kenneth D. Miller M.D., Miklos Simon MD, 2015-02-03 Two leading oncologists along with experts spanning several medical disciplines shed light on the global pandemic of cancer particularly the difference in diagnosis treatment and care between global communities Despite advancing globalization and amazing breakthroughs in modern medicine developing countries continue to struggle with the prevention and treatment of the most common killer in the world today cancer Logistical barriers scarceness of resources and economic hardships in these regions make the screening detection and care of this disease difficult at best This book is the only one of its kind to review the pandemic of cancer from a global and epidemiological perspective The work is presented in three sections focusing on key issues in cancer management treatment of specific types of the disease and the difference in medical care between low medium and high resource countries Chapters address the history incidence and treatment across nations presiding cultural attitudes which may delay or prevent treatment in many parts of the world and the geopolitics of cancer care and funding Patients and caregivers from all around the globe explain the daily challenges of living with the disease in their nation **Clinical Psycho-Oncology** Luigi Grassi, Michelle Riba, 2012-05-18 This international primer on psycho oncology spans settings of care as well as regional boundaries Designed to be easy to read with information clearly displayed in concise tables and boxes accompanied by clinical vignettes the book provides clear practical guidance on all aspects of the psychological care of patients with cancer Both trainees and practitioners will find it useful in the clinic as well as a resource for continued professional development **Textbook of Palliative Medicine** Eduardo Bruera, Irene Higginson, Charles F von Gunten, 2009-01-30 Textbook of Palliative Medicine provides an alternative truly international approach to this rapidly growing specialty This textbook fills a niche with its evidence based multi professional approach and global perspective ensured by the international team of editors and contributing authors In the absence of an international curriculum for the study of palliative medicine this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field and the structure and content have been constructed very much with this in mind With an emphasis on providing a service anywhere in the world including the important issue of palliative care in the developing nations Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors and is an ideal complement to them It is essential reading for all palliative care
