Resistance and Rebellion Lessons from Eastern Europe explains how ordinary people become involved in resistance and rebellion against powerful regimes The book shows how a sequence of casual forces social norms focal points rational calculation operate to drive individuals into roles of passive resistance and at a second stage into participation in community based rebellion organization By linking the operation of these mechanisms to observable social structures the work generates predictions about which types of community and society are most likely to form and sustain resistance and rebellion The empirical material centres around Lithuanian anti Soviet resistance in both the 1940s and the 1987 91 period Using the Lithuanian experience as a baseline comparisons with several other Eastern European countries demonstrate the breadth

and depth of the theory The book contributes to both the general literature on political violence and protest as well as the theoretical literature on collective action

Common-Property Arrangements and Scarce Resources Edward M. Barbanell, 2001-09-30 It is widely held that private ownership is the preferred end state for all scarce resources Those who hold this view have not looked closely enough at water in the American West Barbanell contends Because of water's special attributes private ownership is an ineffective means for protecting individuals' interests Splitting the various rights of ownership between individual resource users and the community to which they belong can better protect those interests Barbanell develops a conception of this form of common ownership a common property arrangement and shows that it can function effectively for water in the West More generally he offers an expanded framework for analyzing right relationships and examining problems related to resource scarcity Some economists argue that John Locke's account of property justifies the private ownership of water in the West Barbanell argues however that because Locke did not think carefully enough about the variable nature of resources his account does not support that conclusion Although economists recognize that private ownership may not be perfectly suited to all resources they are nonetheless skeptical about common ownership alternatives Barbanell shows that this skepticism is unwarranted When the rights relationship among members of a resource community is based on mutual expectations of reciprocal behavior then a common property arrangement can function effectively to control the degradation and depletion of a scarce resource Barbanell's argument that common ownership is a conceptually sound and politically viable alternative for water will be of particular interest to public policy makers environmentalists resource economists and political philosophers

Another Liberalism Nancy L. Rosenblum, 1987 Another Liberalism contributes an original perspective to debates about the nature and foundations of liberal thought In it Nancy Rosenblum describes the dynamic of romanticism and liberalism as one of mutual opposition and reconciliation She argues that romanticism sees liberalism as cold contractual and aloof And conventional liberal legalism disdains romanticism's longing for all that is personal unique and expressive We learn however that romanticism chastened by its excesses and frustrated by its failures can come home to liberalism We also learn that liberalism can accommodate individuality and expressivity reclaiming what it had repressed Rosenblum creates a typology of romantic reconstructions of liberal thought heroic individualism communitarianism and a new face of pluralism The author draws on nineteenth and twentieth century philosophy and literature on Thoreau Humboldt Constant Stendhal and Mill among others and on contemporary political theorists for whom romanticism is a source not only of aversion to liberalism but also of resources for reform
