Evidence-Based Crime Prevention David P. Farrington,Doris Layton MacKenzie,Lawrence W. Sherman,Brandon C. Welsh,2003-09-02 Crime prevention policy and practice is on the whole far from objective Instead of being based on scientific evidence the crime policy agenda is seemingly driven by political ideology anecdotal evidence and programme trends Evidence Based Crime Prevention seeks to change this by comprehensively and rigorously assessing the existing scientific knowledge on the effectiveness of crime prevention programmes internationally Reviewing more than 600 scientific evaluations of programmes intended to prevent crime in settings such as families schools labour markets and communities this book grades programmes on their scientific validity using the scientific methods scale This collection which brings together contributions from leading researchers in the field of crime prevention will provide policy makers researchers and community leaders with an understandable source of information about what works what does not work and what is promising in preventing crime

in the United States They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing Proactive Policing reviews the evidence and discusses the data and methodological gaps on 1 the effects of different forms of proactive policing on crime 2 whether they are applied in a discriminatory manner 3 whether they are being used in a legal fashion and 4 community reaction This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U S communities
