## Introduction

Community corrections is an extremely important area of the criminal justice system because it helps to prepare inmates for becoming productive members of society. Unfortunately, community-based programs that can serve as effective alternatives to incarceration are substantially underutilized, which underscores a need for a reform of crime prevention policies in the United States. The aim of this paper is to discuss how the topic of community corrections has influenced my knowledge of the criminal justice system.

## Discussion

Community corrections are the topic that has been the easiest to understand because, unlike other aspects of criminal justice, this is the area of the administration of punishment that is the most familiar to me. It has to do with the fact that a friend of mine has been working at the Department of Corrections for three years. Her responsibilities as a community corrections officer include the provision of day reporting services, housing assistance, mentoring, and family reunification. Re-entry services provided by Fiona help to ensure that parolees receive cognitive-based therapy, avoid substance abuse and engage in pro-social activities. It is extremely important since many individuals after their release into a community exhibit anti-social beliefs and behaviors, thereby threatening social cohesion and safety.

The weekly topic has helped me to understand that evidence-based practices used by community corrections officers help reducing negative peer associations, which are known to improve the effectiveness of programs used by correctional agencies. My understanding of the criminal justice system has been enhanced by the introduction to community corrections topic because it has allowed me to realize that overreliance on imprisonment as the administration of punishment creates the problem of prison overcrowding. The issue is a source of great concern in the country because growing

*Encyclopedia of Community Corrections* Shannon M. Barton-Bellessa, 2012-04-17 In response to recognition in the late 1960s and early 1970s that traditional incarceration was not working, alternatives to standard prison settings were sought and developed. One of those alternatives, community based corrections, had been conceived in the 1950s as a system that might prove more progressive, humane, and effective, particularly with people who had committed less serious criminal offenses and for whom incarceration with constant exposure to serious offenders and career criminals might prove more damaging than rehabilitative. The alternative of community corrections has evolved to become a substantial part of the criminal justice and correctional system, spurred in recent years not so much by a progressive humane philosophy as by dramatically increasing prison populations, court orders
