Community In The American West:

Community in the American West Stephen Tchudi, 1999 This work brings together photographers poets and essayists to explore historical and contemporary views of community in the American West Writers reject the tradition of judging western communities in terms of established values from the Eastern US and Europe and they develop dimensions of the concept of community by studying such diverse settings and populations as the coal country of Colorado the southern California suburbs and the lives of ethnic and cultural minorities Although the writers specifically discuss community in the West the message deriving from the collection is a broader one that links this book to long standing traditions in the humanities this is a book about the community of humankind

Red Lodge and the Mythic West, Bonnie Christensen, 2002. Tracing the story of Red Lodge from the 1880s to the present, Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive industries economy. She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities, exploring how and why westerners first rejected and then embraced western images and how ethnicity, wilderness and historic preservation became part of the identity that defined one town.

BOOK JACKET Environmental Protection Policy and Experience in the U.S. and China's Western Regions, Joel J. Kassiola, Sujian Guo, Jijiao Zhang, 2010-06-14. China is a multiethnic country with vast territory, a land of diverse ecosystems. With the drive for industrialization in China and the implementation of western grand development strategy in western regions, both governments and people face great challenges in environmental protection and sustainable use of biodiversity resources as a result of growing interaction between human activities and natural environment. To meet the challenges, governments in these regions need to adopt a series of important policy measures, not only to reduce industrial emissions but also to return farmland to forests and pasture to grasslands and to implement measures of ecological migration to reduce human activities in ecological conservation areas. In this regard, China must not only learn profound lessons from industrialized countries but also search for international cooperation. The United States provides some good comparative case studies on the environmental protection, grassroots environmental management and conservation policies in western regions. This book attempts to address key questions about Chinese and U.S. environmental policies by looking at historical development of environmental protection and current environmental policy in the western regions of the two countries.
