Handbook of Ethnography Paul Atkinson,Sara Delamont,Amanda Coffey,John Lofland,Lyn Lofland,2007-04-25 I wish the Handbook of Ethnography had been available to me as a fledgling ethnographer I would recommend it for any graduate student who contemplates a career in the field Likewise for experienced ethnographers who would like the equivalent of a world atlas to help pinpoint their own locations in the field Journal of Contemporary Ethnography No self respecting qualitative researcher should be without Paul Atkinson s handbook on ethnography This really is encyclopaedic in concept and scope Many big names in the field have contributed so this has to be the starting point for anyone looking to understand the field in substantive topic theoretical tradition and methodology SRA News Ethnography is one of the chief research methods in sociology anthropology and other cognate disciplines in the social sciences This Handbook provides an unparalleled critical guide to its principles and practice The volume is organized into three sections The first systematically locates ethnography firmly in its relevant historical and intellectual contexts The roots of ethnography are pinpointed and the pattern of its development is demonstrated The second section examines the contribution of ethnography to major fields of substantive research The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly The third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars The Handbook of Ethnography provides readers with a one stop critical guide to the past present and future of ethnography It will quickly establish itself as the ethnographer s bible

Mendras,I. Mihailescu,2013-10-22 This volume is the result of an international comparative research project entitled The Future of Rural Communities in Industrialized Societies The presentation of national studies led to discussions on the methods of local studies on their theoretical basis and on their scientific and practical use It is these discussions which are featured in this book The national studies themselves are now published by Pergamon Press in volumes I and II of Rural Community Studies in Europe with a third volume to come *Spirits of Community* K. D. M. Snell,2016-06-16 Concern about the decline of community and the theme of community spirit are internationally widespread in the modern world The English past has featured many representations of declining community expressed by those who lamented its loss in quite different periods and in diverse genres This book analyses how community spirit and the passing of community have been described in the past whether for good or ill with an eye to modern issues such as the so called loneliness epidemic or the social consequences of alternative structures of community It does this through examination of authors such as Thomas Hardy James Wentworth Day Adrian Bell and H E Bates by appraising detective fiction writers analysing parish magazines considering the letter writing of the parish poor in the 18th and 19th

centuries and through the depictions of realist landscape painters such as George Morland K D M Snell addresses modern social concerns showing how many current preoccupations had earlier precedents In presenting past representations of declining communities and the way these affected individuals of very different political persuasions the book draws out lessons and examples from the past about what community has meant hitherto setting into context modern predicaments and judgements about spirits of community today

Community Building in the Twenty-first Century Stanley Hyland (Ph. D.), 2005 Community has long been a critical concept for social scientists and never more so amid the growing economic inequity natural and human disasters and warfare of the opening years of the twenty first century In this volume leading scholar activists develop a conceptual framework for both the theory and practice of building communities Rethinking the very concept in light of technological change and globalization they examine local responses to worldwide trends study the ways that communities generate and use resources and evaluate existing theories and approaches to community building to determine the best strategies for fostering community strength and vitality Their work with groups ranging from refugees religious charities and poor urban neighborhoods to tribal peoples international corporations and public health agencies demonstrates that local communities contain the seeds for a more desirable future and suggests how we may encourage those seeds to grow
