Community Work Learning And Supervision:

Community Work Catherine Briscoe, David N. Thomas, 2021-11-07 The growth of interest in community work during the seventies was very marked But while much had been written on the actual practice of community work there was for too long a lack of British material on the vital subjects of useful theory training and the development of skills In this title originally published in 1977 the authors brought together for the National Institute for Social Work experienced teachers and practitioners of community work in an integrated and carefully structured textbook which would further understanding of the means through which community workers develop their knowledge and skills it would be widely welcomed by all those involved in aspects of community work as teachers students practitioners supervisors and as local authority training officers The first part of the book has four chapters on the principle means through which community workers develop their skills within their employing agencies Part two deals with theories and the contribution made to community work by the social sciences group work research methods and management and planning studies The last part of the book contains three papers which examine the major problems and issues in the placement learning experiences and assessment of students on field work

Community Work Community work, 1977 **Principles and Practice of Informal Education** Linda Deer Richardson, Mary Wolfe, 2001 This new key text explores the principles and practice of informal education and focuses in particular on the notion of working with which is central to practice in this sector Practice and Service Learning in Occupational Therapy Theresa Lorenzo, Madeleine Duncan, Helen Buchanan, Auldeen Alsop, 2006-07-11 While this book is based primarily on experiences of occupational therapy practice education in South Africa it aims to have international appeal as key principles of practice and service learning are drawn from the differing scenarios covered Based on qualitative research some of the book's chapters describe issues faced by students in complex practice situations and highlight educational strategies for promoting socially responsive professional development They show how students engage with the personal and professional challenges of working in a multicultural society and how situated learning can enhance their resourcefulness in meeting the needs of individuals groups and communities The book is divided into three sections The first on the practice education agenda establishes the academic rationale for various forms of practice learning within an occupational therapy curriculum The second section examines the learning opportunities offered by different practice contexts and highlights mechanisms for developing the professional identity of students The final section on enhancing potential reviews mechanisms that may be used for supporting students in the field and ends with a look at the future of practice education and how it might develop in response to social and international drivers *Community Service-Learning* Rahima C. Exploring Cultural Dynamics and Tensions Within Service-Learning Trae Stewart, Nicole Webster, 2011-09-01

Service learning is an exciting pedagogy and field of study offering insight into how academic study and community engagement blend to create social change In its most traditional conceptualization servicelearning activities typically manifest within communities where outside individuals address a need Service learning is purported to have a transforming effect on individual student perspectives by providing students the opportunity to interact with people and enter into situations that allow students to test their predisposition towards others However the literature on the impact of service learning on participants acceptance of diversity and development of open mindedness reports mixed outcomes The purpose of this book is to explore cultural tensions and dynamics within the field of service learning It is not meant to be an exhaustive review of the interplay between culture and service learning but rather a starting point for an ongoing conversation about how this complex topic impacts the field In 18 chapters educators students and administrators investigate the cultural values of service learning itself and the tensions created when this is at odds with the values of others within K 12 and higher education in the United States and abroad Authors include community organization representatives researchers directors of offices of community engagement university administrators junior and senior faculty and former service learning undergraduate students Submissions reflect a range of genres including theoretical conceptual pieces position papers case studies and other traditional academic essays challenging how students and community members are affected by the cultural tensions within service learning engagement
