Community Worker:

Community Worker's Guide Michel Lafortune, Annie Bouchard, 2010-10 **The Making of Community Work** David N. Thomas, 2024-11-01 Originally published in 1983 The Making of Community Work is the outcome of a two year study of community work in the United Kingdom The main purpose of the study was to review the development of community work and to suggest some of the issues in practice and training that might be important in the 1980s Much of the first part of the book is taken up with the emergence of community work as an occupation David Thomas tries to clarify its contribution to a number of political and social processes and to define community work in a way which distinguishes it from other kinds of interventions The second part of the book deals with training research literature and employment in community work it includes a review of college and field based training opportunities and a critical discussion of the state of theory and ideology in the occupation It was hoped it would be an important source of ideas and inspiration for the years ahead It was the first major review of community work since its re discovery in the 1960s it will still be of interest to all those involved in community work or wishing to understand its influence on other professions The book was intended for fieldworkers administrators policy makers trainers and students in community work and in related occupations and disciplines Thomas presents his ideas clearly and his ability to look critically at some of the basic assumptions in community work makes for stimulating and enjoyable reading *Community Worker* James Bentley Taylor, Jerry Randolph, 1975 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com The Boundaries of Change in Community Work Paul Henderson, David Jones, David N. Thomas, 2021-11-07 Since the late 1960s community work had emerged in its own right as an occupation with an increasingly important contribution to make both to ways of thinking within the field of social policy and to day to day social work practice and the resolution of pressing community issues Its practitioners had grown in numbers and experience while community work ideas and methods continued to influence developments in a variety of other neighbouring occupations Originally published in 1980 the editors of this NISW collection suggest that if community workers are to remain effective then they must stay on the boundaries of the agencies that employ them and of the groups with whom they work This theme of the boundary nature of community work is examined in detail in the Introduction and is subsequently taken up by the other contributors to the book This title is organised under three main headings a survey section on the history philosophy and theories of community work in the United Kingdom a series of case studies that suggest the diversity of the interests of community work and an analysis of the growth of community work as an occupation and the spread of its influence through related professions and disciplines This mix of theory practice and analysis made the book of special importance both to practising community workers and to community work teachers and students at the time In addition the book would have been of direct interest to community oriented administrators professionals teachers and students in other human service fields such as health education housing planning and the

personal social services as well as to elected members and administrators in central and local government more generally It will now be welcomed by anyone who seeks a critical account of the historical activities of community work written by experienced practitioners and teachers
