Community-Based Health Interventions Sally Guttmacher, Patricia Kelly Vana, Yumary Ruiz-Janecko, 2010-02-02 Community Based Health Interventions covers the skills necessary to change health in a community setting through the reduction of disease conditions and risks to health as well as create a supportive environment for the maintenance of the behavior changes The first section provides background information about why interventions in communities are important the history of several major community interventions ethical issues in the design and implementation of interventions and the different types of interventions The second section covers planning and activities needed to complete an intervention along with the theoretical basis of interventions The third section shows how to assess the needs and strengths of a particular community gain community support define the goals of an intervention and get started This section also contains information on obtaining material and financial support and on strategies for

continuing the intervention beyond its initial phase The final section examines current work and problems encountered as well as projecting future trends Each chapter includes practice exercises or activities useful to students learning to develop interventions at the population or community level such as public health social work and nursing *Community-Based Participatory Research for Health* Meredith Minkler,Nina Wallerstein,2011-04-18 Minkler and Wallerstein have pulled together a fantastic set of contributions from the leading researchers in the field In addition to a fine collection of case studies this book puts the key issues for researchers and practitioners in a historical philosophical and applied practical context **Evidence-Based Public Health** Ross C. Brownson,Elizabeth A. Baker,Terry L. Leet,Kathleen N.

Gillespie,William R. True,2010-12-03 There are at least three ways in which a public health program or policy may not reach stated goals for success 1 Choosing an intervention approach whose effectiveness is not established in the scientific literature 2 Selecting a potentially effective program or policy yet achieving only weak incomplete implementation or reach thereby failing to attain objectives 3 Conducting an inadequate or incorrect evaluation that results in a lack of generalizable knowledge on the effectiveness of a program or policy and 4 Paying inadequate attention to adapting an intervention to the population and context of interest To enhance evidence based practice this book addresses all four possibilities and attempts to provide practical guidance on how to choose carry out and evaluate evidence based programs and policies in public health settings It also begins to address a fifth overarching need for a highly trained public health workforce This book deals not only with finding and using scientific evidence but also with implementation and evaluation of interventions that generate new evidence on effectiveness Because all these topics are broad and require multi disciplinary skills and perspectives each chapter covers the basic issues and provides multiple examples to illustrate important concepts In addition each chapter provides links to the diverse literature and selected websites for readers wanting more detailed information An indispensable volume for professionals students and researchers in the public health sciences and preventative medicine this new and updated edition of Evidence Based Public Health aims to bridge research and evidence with policies and the practice of public health **Community Engagement, Organization, and Development for Public Health Practice** Frederick

Methods for Community-Based Participatory Research for Health Barbara A. Israel, Eugenia Eng, Amy J. Schulz, Edith A. Parker, 2012-09-20 This thoroughly revised and updated second edition of *Methods for Community Based Participatory Research for Health* provides a step by step approach to the application of participatory approaches to quantitative and qualitative data collection and data analysis With contributions from a distinguished panel of experts this important volume shows how researchers practitioners and community partners can work together to establish and maintain equitable partnerships using a Community Based Participatory Research CBPR approach to increase knowledge and improve the health and well being of the communities involved

Written for students practitioners researchers and community members the book provides a comprehensive presentation of innovative partnership structures and processes and covers the broad spectrum of methods needed to conduct CBPR in the widest range of research areas including social determinants of health health inequities health promotion community interventions disease management health services and environmental health The contributors examine effective methods used within the context of a CBPR approach including survey questionnaire in depth interview focus group interview ethnography exposure assessment and geographic information system mapping In addition each chapter describes a case study of the application of the method using a CBPR approach The book also contains examples of concrete tools and measurement instruments that may be adapted by others involved in CBPR efforts

Community-Based Health Interventions in an Institutional Context Steven L. Arxer, John W. Murphy, 2019-09-13 *Community Based Health Interventions in an Institutional Context* examines challenges of institutionalizing community based health care While the community based or localized model is growing in popularity and importance in the United States in practice it must often be brought in to larger institutions in order to grow to scale The typical goals of an institution standardization formalization and control may be seen as antithetical to those of a community based healthcare provider such as spontaneity customization and flexibility The contributions to this work raise questions about how the community based model can be scaled up through institutions and how institutionalization can be rethought from a bottom up approach They provide not only an overview of

community based organizations but also delve into practical topics such as establishing budgets training workers incorporating technology as well as more theoretical topics like goal setting policy effects like the ACA and relationships between patient and community This work will be of interest for researchers interested in exploring the community based health care model as well as practitioners in health care and health policy

Community-based Public Health Thomas Allen Bruce, Steven Uranga McKane, 2000 Developing meaningful partnerships with the communities they serve is crucial to the success of institutions nonprofit organizations and corporations This book focuses on public health practice in communities the education and training of public health professionals at colleges and universities and public health research and scholarly practice within academic institutions

Community-Based Participatory Research Karen Hacker, 2013 Community Based Participatory Research by Dr Karen Hacker presents a practical approach to CBPR by describing how an individual researcher might understand and then actually conduct CBPR research This how to book provides a concise overview of CBPR theoretical underpinnings methods considerations and ethical issues in an accessible format interspersed with real life case examples that can accompany other methodologic texts in multiple disciplines

An Integrated Framework for Assessing the Value of Community-Based Prevention Committee on Valuing Community-Based, Non-Clinical Prevention Programs, Board on Population Health and Public Health Practice, Institute of Medicine, 2012-12-13 During the past century the major causes of morbidity and mortality in the United States have shifted from those related to communicable diseases to those due to chronic diseases Just as the major causes of morbidity and mortality have changed so too has the understanding of health and what makes people healthy or ill Research has documented the importance of the social determinants of health for example socioeconomic status and education that affect health directly as well as through their impact on other health determinants such as risk factors Targeting interventions toward the conditions associated with today s challenges to living a healthy life requires an increased emphasis on the factors that affect the current cause of morbidity and mortality factors such as the social determinants of health Many community based prevention interventions target such conditions Community based prevention interventions offer three distinct strengths First because the intervention is implemented population wide it is inclusive and not dependent on access to a health care system Second by directing strategies at an entire population an intervention can reach individuals at all levels of risk And finally some lifestyle and behavioral risk factors are shaped by conditions not under an individual s control

For example encouraging an individual to eat healthy food when none is accessible undermines the potential for successful behavioral change Community based prevention interventions can be designed to affect environmental and social conditions that are out of the reach of clinical services Four foundations the California Endowment the de Beaumont Foundation the W K Kellogg Foundation and the Robert Wood Johnson Foundation asked the Institute of Medicine to convene an expert committee to develop a framework for assessing the value of community based non clinical prevention policies and wellness strategies especially those targeting the prevention of long term chronic diseases The charge to the committee was to define community based non clinical prevention policy and wellness strategies define the value for community based non clinical prevention policies and wellness strategies and analyze current frameworks used to assess the value of community based non clinical prevention policies and wellness strategies including the methodologies and measures used and the short and long term impacts of such prevention policy and wellness strategies on health care spending and public health An Integrated Framework for Assessing the Value of Community Based Prevention summarizes the committee s findings

Case Studies in Community Health Jo Fairbanks, Judith Candelaria, 1998-04-08 Case Studies in Community Health presents 14 classroom tested case study scenarios including background information and discussion questions Written for students in public health and community health courses these cases help integrate the basic concepts of public health into an applied setting The case studies provide an opportunity for students to apply those basic concepts to a real life situation The overall purpose of the book is to help students understand that public health practice occurs in a social context and therefore is subject to all the complexities of a social environment The cases explore a broad range of topics in three critical areas of public health epidemiology health administration and health program planning This text will be of interest students and professionals in family studies family therapy gerontology health communication medical sociology nursing nursing administration nursing health nursing research and theory patient care public administration public health quantitative research and methods school counseling social work and sociology

Dimensions of Community-Based Projects in Health Care Steven L. Arxer, John W. Murphy, 2017-09-19 This salient reference grounds readers in the theoretical basis and day to day practice of community based health care programs and their potential as a transformative force in public health Centering around concepts of self determination empowerment and inclusiveness the book details the roles of physicians research and residents in the transition to self directed initiatives and greater community control Community focused interventions and methods starting with genuine dialogue between practitioners and residents are discussed as keys to understanding local voice and worldview and recognizing residents as active participants and not simply targets of service delivery And coverage pays careful attention to training issues including how clinicians can become involved in community based care without neglecting individual patient needs Among the topics covered are Narrative medicine in the context of community based practice Qualitative and participatory action research Health committees as a community based strategy Dialogue world

entry and community based intervention Politics of knowledge in community based work Training physicians with communities Dimensions of Community Based Projects in Health Care challenges sociologists social workers and public health administrators to look beyond traditional biomedical concepts of care and naturalistic methods of research and toward more democratic programs planning and policy The partnerships described in these pages reflect a deep commitment to patients lives and to the future of public health p Community-Based Health Interventions Sally Guttmacher,Patricia J.
