Community Development Learning Action:

Community Development Hayden Roberts, 1979-12-15 Community development is often shaped by purely economic and political considerations but it can also function as a process of education that expresses the perceptions of people and enhances their control of their society Drawing on his experiences of economic models of development in Africa and Canada Hayden Roberts design a practice theory of development that emerges from and responds to the needs of the community itself His analysis emphasizes the political nature of the process and the central role of adult education in achieving the goals of a given community His theory in brief is that affected people are more capable than outsider of perceiving and assessing the conditions of their lives and that with appropriate inspiration and guidance they can plan and act to change these conditions for the better Theories of learning communication intergroup and interpersonal behaviour organization economic development and political change are all utilized towards the formulation of a comprehensive theory and practical approach to community development planning Roberts advances a people oriented approach to development that draws its models from various disciplines and takes into account the local social economic and material needs of the community as well as the native abilities of the people concerned His conclusions are equally relevant to third world societies and to minority groups or sub cultures in industrialized societies and they are presented with remarkable clarity and consciousness He sifts through a maze of theories and emerges with a plausible theory of community development that is backed a every stage by the lessons of practical experience The broadly based and humane work will interest all concerned with the process of community development from planning to action *Lifelong Action Learning for Community Development* Ortrun Zuber-Skerritt, Richard Teare, 2013-10-30 This book explains and demonstrates how indigenous communities built on traditional knowledge culture and language can be extended and strengthened by 1 the new integrated methodology of Lifelong Action Learning LAL and 2 new approaches to learning and development as exemplified by the system of GULL Global University for Lifelong Learning The GULL system harnesses the potential of people to bring about positive change together characterized by self reliance financial independence and cascading learning and benefits to others It is a self directed and self sustainable process of learning and growth The case studies in this book provide evidence that over time economically very poor communities can achieve transformations that bring with them many benefits personally professionally and for the community This book manages to accomplish an almost impossible goal to be both deeply inspirational and highly practical all at the same time Professor Mary Brydon Miller USA I was sold on this book from the foreword the need to rethink how we think about and do education is emerging as a hot topic among academics Professor Lesley Wood South Africa All development practitioners and students should study this book carefully as should aid bureaucrats and aid donors Dr Chad Perry Australia In this book Ortrun Zuber Skerritt and Richard Teare invite us to re think re evaluate and re create our views of learning Associate Professor Doris Santos Colombia In this new book the authors
