and makes use of interdisciplinary and transdisciplinary perspectives to understand the complex issues being faced by a range of different communities that are reliant on different types of resources across the world From coal and gold mining to fishing towns and logging communities the book explores the legacies of boom and bust economies social memory trauma and identity the interactions between power and knowledge and the implications for adaptive governance Balancing conceptual and theoretical understandings with empirical and practical knowledge of resource communities natural resource use and social ecological relationships the book argues that solutions for individual communities need to be embraced in the community and not just in the perspectives of visiting experts Linking the past present and futures of resource communities in a new way the book concludes by providing practical recommendations for breaking open dependencies on the past including deepening awareness of the social economic and environmental contexts establishing strong governance and developing community strategies plans and policies for the future This book will be of great interest to students and scholars of natural resource governance and management extractive industries environmental policy community planning and development environmental geography and sustainable development as well as policymakers involved in supporting community development in natural resource dependent communities across the world
