The Community Press in an Urban Setting Morris Janowitz, 1967 **The community press in an urban setting: the social elements of urbanism, with a postscript by S. Greer** Morris Janowitz, **Reinventing Human Services** Benjamin Higgins, 2017-07-05 Dissatisfaction with a human services system that is unresponsive stigmatizing and ineffective has led to a ferment of experimentation in recent years Reinventing Human Services examines the historical and economic context of current efforts to reinvent human services showing the urgency and the difficulty of the task It draws on successful examples in Britain Canada and the United States to develop a new paradigm for social work practice one that integrates individual family and community levels of practice and reconceptualizes professional community relations The interdisciplinary team of authors includes scholars researchers and practitioners from the disciplines of economics urban planning communications criminal justice psychology marriage and family therapy education and social work *Social Change and Politics* Morris Janowitz, 2017-07-05 This classic study deals with social control in advanced industrial society especially the United States and particularly the half century after World War I The United States is representative of Western advanced industrial nations that have been faced with marked strain in their political institutions These nation states have been experiencing a decline in popular confidence and distrust of the political process an absence of decisive legislative majorities and an increased inability to govern effectively that is to balance and to contain competing interest group demands and resolve political conflicts Janowitz uses the sociological idea of social control to explore the sources of these political dilemmas Social control does not imply coercion or the repression of the individual by societal institutions Social control is rather the face of coercive control It refers to the capacity of a social group including a whole society to regulate itself Self regulation implies a set of higher moral principles beyond those of self interest Since the end of World War II the expanded scope of empirical research has profoundly transformed the sociological discipline The repeated efforts to achieve a theoretical reformulation have left a positive residue but there have been no new conceptual breakthroughs that are compelling This book is a concerted and detailed effort organize and to make sense out of the vastly increased body of empirical research

Community Organization for Urban Social Change Robert Fisher, Peter Romanofsky, 1981-11-25 Community Media and Identity in Ireland Jack Rosenberry, 2017-10-10 This book explores how Ireland's community media outlets reflect and shape identity at the local level While aspects of its culture date back centuries the nation state of Ireland is less than one hundred years old Because of this and other elements of the island's history Irish identity is a contested topic and the island is a place where culture identity and geography are tightly intertwined By addressing how community media serve as agents for community building the book examines how they in turn influence the way individuals connect with their communities *Media and Social Inequality* John Pollock, 2014-06-11 This book is among the first to systematically explore the impact of community inequality on reporting political and social change Although most journalism scholars are still

fascinated by the impact of media on society Media and Social Inequality explores the reverse perspective the impact of society on media Using a community structure approach and rejecting the perspective that studies of media and audiences can be reduced to the individual level of psychological phenomena all contributions examine connections between community level macro characteristics and variations in the coverage of critical issues This innovative book differs from previous community structure volumes in two ways First contributions explore a far wider range of community characteristics by employing creative methodologies modern archives and databases that facilitate larger more diverse samples multilevel and longitudinal analyses composite measures of both content and editorial judgment new technologies and social network analysis Second a traditional emphasis on media as instruments of political and social control is replaced by media as potential mirrors of social change exploring bottom up measures of vulnerability concentrated disadvantage and ethnic diversity pluralism The volume contains two original chapters one on nationwide US coverage of the Occupy movement in the expanded introduction and another on nationwide US coverage of universal health care This book was originally published as a special issue of Mass Communication and Society *The Dynamics of Urban Social Boundaries* David Kent Miller,1974
