Community Psychiatric Nursing Myth And Reality:

Reflections on Community Psychiatric Nursing Tony Gillam, 2003-09-02 Reflections on Community Psychiatric Nursing provides new insights into many aspects of the CPN's work. Written by a practising CPN, this is a lively and easy to read introduction to the key debates in community mental health covering issues including professional identity, the community and the role of the nurse, teaching, assessment and clinical supervision, good practice and the concept of risk, mental health promotion, user involvement, treatment from medication to psychosocial interventions. This text is essential reading for students and those undertaking further training as CPNs. In addition, practising nurses and other professionals will find it useful in developing their own reflective practice as well as offering a useful overview of an increasingly important area of nursing.

Community Psychiatric Nursing Charles Brooker and Edward White, 2013-12-11 Community Mental Health Centers, Perspectives of the Seventies, 1981 **DHHS Publication No. (ADM)**, 1981 *Crisis Services and Hospital Crises* Dylan Tomlinson, Kevin Allen, 2018-12-17 First published in 1999. This text examines the impasse in the development of alternatives to hospitals, drawing on the experience of both crisis service users and providers, and evidence of the effectiveness of such services. The book concludes that crisis services are preferred by users, are usually more cost effective and often more clinically effective than acute admissions wards. It offers a number of policy suggestions to advance the role of crisis services, including monitoring, evaluation and development centres or programmes being established on a national basis and joint training between crisis service and hospitals.

In addition, the drug section has been greatly expanded and highlights drugs separately in an appendix.

Counselling in Primary Health Care Jane Keithley, Geoffrey Norman Marsh, 1995. A substantial proportion of the problems that bring patients to general practice are associated with stress, relationships and psychological or psychosomatic responses to difficulty in their lives. This book will help all those in the primary health care team to examine their roles as counsellors to those patients themselves or as the gateway to other counselling services. The authors, who include those working in medicine, nursing, social work, psychology, sociology, social policy and economics, discuss the different points of view regarding the position of counselling in primary care and which team members are the most appropriate counsellors. As the burdens on the primary health care team increase, many more health care workers will find themselves becoming involved in the many diverse aspects of providing counselling.
