Community Psychology and the Schools George J. Allen, Jack M. Chinsky, Stephen W. Larcen, John E. Lochman, Howard V. Selinger, 2017-09-13 Originally published in 1976 this volume begins with a theoretical overview of the major trends in the community psychology movement at the time as well as a perspective on how the field was developing The emphasis is on the utility of combining a preventative community centered orientation with an applied behavioral analytic focus The authors take general theoretical notions and demonstrate how they can be turned to concrete methods of dealing with specific practical problems that occur in implementing a real life program of community oriented intervention The authors present an innovative model for developing a low cost and effective delivery system for mental health services in public schools They describe the actual development and implementation of such a system in the school and also include a comprehensive evaluative scheme for determining the efficacy of this type of endeavor The actual behavior change strategies that are employed can be used effectively by teaching personnel or psychologists on either a large or small scale A final unique feature of the volume is the inclusion of a program that will assist teachers and mental health professionals in helping elementary school students learn social problem solving skills

**Comprehensive Children's Mental Health Services in Schools and Communities** Robyn S. Hess, Rick Jay Short, Cynthia E. Hazel, 2013-06-19 Despite the growing emphasis on a population based training and service delivery model for school psychology few resources exist to provide guidance concerning how such services might be conceptualized and put into place In this book the authors propose a public health model for comprehensive children s mental health services that expands rather than replaces the traditional model of school psychology The background and theoretical perspective for this public health model are discussed as an important way to solve problems and accomplish goals in schools after which the authors outline and develop a clear practical procedure for implementing and evaluating programs based on public health ideas A case study in one elementary school walks readers through the stages of applying a public health model detailing the key steps of each stage Finally the authors consider the changes to the role of school psychologist that will be required to practice a public health problem solving model Accompanying downloadable resources contain sample forms handouts and other valuable materials that will be of use to school psychologists implementing this public health model in their schools
