## **Commutative Algebra Proceedings Of The Workshop:**

**Commutative Algebra - Proceedings Of The Workshop** Giuseppe Valla, Ngo Viet Trung, Aron Simis, 1994-08-19 In a relatively short time commutative algebra has grown in many directions Over a period of nearly fifty years starting from the so called homological period till today the area has developed into a rich laboratory of methods structures and problem solving tools One could say a distinct modern trend of commutative algebra is a strong interaction with various aspects of Combinatorics and Computer Algebra This has resulted in a new sense of measuring for old assumptions and a better understanding of old results At the same time Invariant Theory and Algebraic Geometry remain constituents of an everlasting classical source responsible for important themes that have been developed in Commutative Algebra such as deformation linkage algebraic tori and determinantal rings etc This volume of proceedings is well entrenched on the lines of development outlined above As such it aims to keep researchers and mathematicians well informed of the developments in the field

**Commutative Algebra** Aron Simis, 2020-03-09 This unique book on commutative algebra is divided into two parts in order to facilitate its use in several types of courses The first introductory part covers the basic theory connections with algebraic geometry computational aspects and extensions to module theory The more advanced second part covers material such as associated primes and primary decomposition local rings M sequences and Cohen Macaulay modules and homological methods

**Commutative Algebra** Winfried Bruns, Aron Simis, 1990-07-10 The central theme of this volume is commutative algebra with emphasis on special graded algebras which are increasingly of interest in problems of algebraic geometry combinatorics and computer algebra Most of the papers have partly survey character but are research oriented aiming at classification and structural results

**Women in Commutative Algebra** Claudia Miller, Janet Striuli, Emily E. Witt, 2022-03-18 This volume features contributions from the Women in Commutative Algebra WICA workshop held at the Banff International Research Station BIRS from October 20 25 2019 run by the Pacific Institute of Mathematical Sciences PIMS The purpose of this meeting was for groups of mathematicians to work on joint research projects in the mathematical field of Commutative Algebra and continue these projects together long distance after its close The chapters include both direct results and surveys with contributions from research groups and individual authors The WICA conference was the first of its kind in the large and vibrant area of Commutative Algebra and this volume is intended to showcase its important results and to encourage further collaboration among marginalized practitioners in the field It will be of interest to a wide range of researchers from PhD students to senior experts

**Commutative Algebra, Singularities and Computer Algebra** Jürgen Herzog, Victor Vuletescu, 2003-10-31 Proceedings of the NATO Advanced Research Workshop held in Sinaia Romania 17 22 September 2002

**A Singular Introduction to Commutative Algebra** Gert-Martin Greuel, Gerhard Pfister, 2012-12-06 In theory there is no difference between theory and practice In practice there is Yogi Berra A SINGULAR Introduction to Commutative Algebra offers a rigorous introduction to commutative algebra and at the same time provides

algorithms and computational practice In this book we do not separate the theoretical and the computational part Coincidentally as new concepts are introduced it is consequently shown by means of concrete examples and general procedures how these concepts are handled by a computer We believe that this combination of theory and practice will provide not only a fast way to enter a rather abstract field but also a better understanding of the theory showing concurrently how the theory can be applied We exemplify the computational part by using the computer algebra system SINGULAR a system for polynomial computations which was developed in order to support mathematical research in commutative algebra algebraic geometry and singularity theory As the restriction to a specific system is necessary for such an exposition the book should be useful also for users of other systems such as Macaulay2 and CoCoA with similar goals Indeed once the algorithms and the method of their application in one system is known it is usually not difficult to transfer them to another system

**Combinatorial Aspects of Commutative Algebra** Viviana Ene, Ezra Miller, 2009-11-25 This volume contains the proceedings of the Exploratory Workshop on Combinatorial Commutative Algebra and Computer Algebra which took place in Mangalia Romania on May 29-31 2008 It includes research papers and surveys reflecting some of the current trends in the development of combinatorial commutative algebra and related fields This volume focuses on the presentation of the newest research results in minimal resolutions of polynomial ideals combinatorial techniques and applications Stanley Reisner theory and Alexander duality and applications of commutative algebra and of combinatorial and computational techniques in algebraic geometry and topology Both the algebraic and combinatorial perspectives are well represented and some open problems in the above directions have been included Commutative Algebra Winfried Bruns, Aron Simis, 2014-01-15

Representations of Finite Dimensional Algebras and Related Topics in Lie Theory and Geometry Vlastimil Dlab, Claus Michael Ringel, 2004 These proceedings are from the Tenth International Conference on Representations of Algebras and Related Topics ICRA X held at The Fields Institute In addition to the traditional instructional workshop preceding the conference there were also workshops on Commutative Algebra Algebraic Geometry and Representation Theory Finite Dimensional Algebras Algebraic Groups and Lie Theory and Quantum Groups and Hall Algebras These workshops reflect the latest developments and the increasing interest in areas that are closely related to the representation theory of finite dimensional associative algebras Although these workshops were organized separately their topics are strongly interrelated The workshop on Commutative Algebra Algebraic Geometry and Representation Theory surveyed various recently established connections such as those pertaining to the classification of vector bundles or Cohen-Macaulay modules over Noetherian rings coherent sheaves on curves or ideals in Weyl algebras In addition methods from algebraic geometry or commutative algebra relating to quiver representations and varieties of modules were presented The workshop on Finite Dimensional Algebras Algebraic Groups and Lie Theory surveyed developments in finite dimensional algebras and infinite dimensional Lie theory especially as the two areas interact and may have future interactions The workshop on Quantum

Groups and Hall Algebras dealt with the different approaches of using the representation theory of quivers and species in order to construct quantum groups working either over finite fields or over the complex numbers In particular these proceedings contain a quite detailed outline of the use of perverse sheaves in order to obtain canonical bases The book is recommended for graduate students and researchers in algebra and geometry [Commutative Algebra, Singularities and Computer Algebra](#) Jürgen Herzog, Victor Vuletescu, Proceedings of the NATO Advanced Research Workshop held in Sinaia Romania 17-22 September 2002 *Commutative Algebra and Combinatorics*, 2007 Contributed articles presented at the Workshop and the Conference [Connections Between Algebra, Combinatorics, and Geometry](#) Susan M. Cooper, Sean Sather-Wagstaff, 2014-05-16 Commutative algebra, combinatorics and algebraic geometry are thriving areas of mathematical research with a rich history of interaction *Connections Between Algebra and Geometry* contains lecture notes along with exercises and solutions from the Workshop on Connections Between Algebra and Geometry held at the University of Regina from May 29-June 1, 2012 It also contains research and survey papers from academics invited to participate in the companion Special Session on Interactions Between Algebraic Geometry and Commutative Algebra which was part of the CMS Summer Meeting at the University of Regina held June 2-3, 2012 and the meeting Further Connections Between Algebra and Geometry which was held at the North Dakota State University February 23, 2013 This volume highlights three mini-courses in the areas of commutative algebra and algebraic geometry: differential graded commutative algebra, secant varieties and fat points and symbolic powers It will serve as a useful resource for graduate students and researchers who wish to expand their knowledge of commutative algebra, algebraic geometry, combinatorics and the intricacies of their intersection [Computer Algebra in Scientific Computing](#) Andreas Weber, 2019-11-04 Although scientific computing is very often associated with numeric computations, the use of computer algebra methods in scientific computing has obtained considerable attention in the last two decades Computer algebra methods are especially suitable for parametric analysis of the key properties of systems arising in scientific computing The expression-based computational answers generally provided by these methods are very appealing as they directly relate properties to parameters and speed up testing and tuning of mathematical models through all their possible behaviors This book contains 8 original research articles dealing with a broad range of topics ranging from algorithms, data structures and implementation techniques for high performance sparse multivariate polynomial arithmetic over the integers and rational numbers over methods for certifying the isolated zeros of polynomial systems to computer algebra problems in quantum computing [Index of Conference Proceedings](#) British Library. also held at the University of Delaware The latter was supported by the National Science Foundation through Grant INT 9603029 and the Japan Society for the Promotion of Science through Grant MTCS 134 It was natural that the participants of both meetings should interact and consequently several persons attending the Congress also presented papers in the Seminar The success of the ISAAC Congress and the U S Japan Seminar has led to the ISAAC 99 Congress being held in Fukuoka Japan during August 1999 Many of the same participants will return to this Seminar Indeed it appears that the spirit of the U S Japan Seminar will be continued every second year as part of the ISAAC Congresses We decided to include with the papers presented in the ISAAC Congress and the U S Japan Seminar several very good papers by colleagues from the former Soviet Union These participants in the ISAAC Congress attended at their own expense
