## **Quality of Life and Daily Travel**

Margareta Friman, Dick Ettema, Lars E. Olsson, 2018-04-11 This volume analyses the relevance of daily travel in the quality of life of individuals. It provides a broad understanding of the links between life satisfaction, well-being, and travel, the importance of commuting, and different evaluations and measures to assess the experience of commuting and quality of life. Chapters in this book relate travel and quality of life to the built environment, accessibility, and exclusion, travel mode choice, travel satisfaction, and emotions. It brings together distinguished researchers from a variety of academic backgrounds, providing conceptualizations and applications presented as case studies for daily travel and well-being. Findings presented in this book are highly relevant for transport planners, transport marketers, public transport authorities, and environmental professionals in the pursuit of improving people's life.

Time, Consumption and Everyday Life Elizabeth Shove, Frank Trentmann, Richard Wilk, 2009-09-01 Has material civilization spun out of control, becoming too fast for our own well-being and that of the planet? This book confronts these anxieties and examines the changing rhythms and temporal organization of everyday life. How do people handle hurriedness, burn-out, and stress? Are slower forms of consumption viable? In case studies covering the United States, Asia, and Europe, international experts follow routines and rhythms, their emotional and political dynamics, and show how they are anchored in material culture and everyday practice. Running themes of the book are questions of coordination and disruption, cycles and seasons, and the interplay between power and freedom, and between material and natural forces. The result is a volume that brings studies of practice, temporality, and material culture together to open up a new intellectual agenda.

Quality of Life in Communities of Latin Countries Graciela Tonon, 2017-03-11 This book presents a reconfiguration of the concepts of community in Latin countries, as well as the community quality of life and well-being of different groups: children, young people, older adults, migrants. The traditional concept of community has changed together with the way people participate in community spaces. Community nowadays is more than a geographic concentration; it is related to social support, inter-subjectivity, participation, consensus, common beliefs, joint effort, aiming at a major objective, and intense and extensive relationships. This volume presents unique experiences about culture, social development, health, water, armed conflicts, the digital media, and sports within communities, written by authors from Latin countries. This volume is a valuable resource for researchers, students, and policy makers in quality of life studies.

**Geographies, Mobilities, and Rhythms over the Life-Course** Elaine Stratford, 2014-11-20 By thinking in terms of the geographies of mobilities, we are better able to understand the central importance of movements, rhythms, and shifting emplacements over the life course. This innovative book represents research from a new and flourishing multidisciplinary field that includes, among other things, studies on smart cities, infrastructures, and networks, mobile technologies for automated highways, or locative media, mobility justice, and rights to stay or enter or reside. These activities, cadences, and
