En España tres de cada diez personas toman pastillas para dormir o para la depresión tres omeprazol y dos para el colesterol. Solo en 2022 los médicos españoles expidieron más de mil millones de recetas. En los pa

ses ricos el consumo de medicamentos aumenta sin cesar y sin embargo no parece que mejore la salud de la ciudadanía. Al contrario decenas de estudios muestran que más de la mitad de los fármacos son recetados de manera innecesaria y que los medicamentos de uso más común son una de las principales causas de enfermedad incapacitante y muerte. Tras varias décadas dedicadas a la investigación y la docencia el profesor Laporte repasa el origen, la investigación y desarrollo, la regulación, la prescripción y el consumo de medicamentos en la sociedad actual y analiza los intereses y las prácticas de compañías farmacéuticas, legisladores reguladores y profesionales sanitarios que han conducido a la situación actual. Un libro divulgativo que ahonda en nuestra relación con los fármacos y que aboga por acabar con el consumo acrítico que hacemos de ellos. *Manual de anestesia local, 6a edición* Stanley F.
